United Nations Committee of Experts on Global Geospatial Information Management Second session

New York, 13-15 August 2012

Documentation for the Session

Note by the Secretariat

1. The official languages of the United Nations are Arabic, Chinese, English, French, Russian and Spanish. These will consequently be the official languages of the Committee session. Technical reports will be prepared by the Secretariat or other designated authors in line with the items of the provisional agenda, as approved by the Bureau of the Committee. This technical documentation will be available in English. In conformity with standard practice of United Nations intergovernmental sessions, the official reports supporting the various agenda items will be made available to delegates six weeks ahead of the start of the session, i.e. at the latest on 2 July 2012. These session documents will be posted on the website of the United Nations Committee of Experts in Global Geospatial Information Management at http://ggim.un.org/ggim_committee.html.

2. In order to complement the thematic session documents, Governments are invited to forward country reports on the status of their geospatial information activities to the United Nations GGIM Secretariat at their earliest convenience. These country reports serve the purpose of exchanging practical information among member states. They will also support the consideration of the agenda item on the development of a knowledge base for geospatial information. All country reports will be loaded on the Committee session website.

3. Country reports may be prepared in any of the official languages of the United Nations and will be distributed in the language(s) in which they are received. To the extent possible, it is suggested, that each document be accompanied by a summary in English. Acronyms and abbreviations should be spelled out the first time they appear. Documents may be e-mailed to the Global Geospatial Information Management secretariat (see addresses below) either in Microsoft Word or portable document format (PDF).

4. Correspondence relating to the session may be addressed to the United Nations Secretariat as follows:

Mr. Amor Laaribi
Secretariat, Global Geospatial Information Management
