

Developing Common Frameworks and Methodologies

Seoul, 23rd- 26th Oct'11

Sanjay Krishna
Vice President
Infotech Enterprises Limited

Developing Common Frameworks and Methodologies

- Why?
 - Maximise the use of spatial data for improved decision making?
 - Improved collaboration between agencies, countries & regions
 - Improved efficiency – interoperability /collaboration, create once use many times
 - Data Volumes
 - Standardization

Developing Common Frameworks and Methodologies

- Data Cataloguing
- Develop Tools to provide a suitable geo-portal
- Data Capture
- Base reference data should have due regard to future use of the data
- Re-Use of Data

Developing Common Frameworks and Methodologies

Possible Issues

- Multiple standards lead to a divergence of standards
- Public v. Private
- Usage/licencing/pricing issues
- Who's going to pay?

Developing Common Frameworks and Methodologies

Summary

- Frameworks and methods should be driven by the strategic needs of the wider community
- Future proof
- Adoption

THANK YOU
