The following parts of the Statutes are proposed to be amended accordingly.

Article 2 Mandate and Authority
Article 3 Aim
Article 5 Objectives
Article 6 Liaison with other International Organizations
Article 10 Executive Board
Article 11 Functions of Executive Board
Article 14 Occurrence of Meetings
& Rule 26

Article 2 Mandate and Authority

Given that the Economic and Social Council (ECOSCO) decided in July 2016 that the substantive mandates and obligations of UNRCC-AP shall be assumed by the United Nations Committee of Experts on Global Geospatial Information Management (UNCE-GGIM) at the global level, and their technical and substantive activities at the regional and national levels assumed by the Committee, the Committee shall operate under the purview of the UNCE-GGIM and submit its report as well as recommendations to the UNCE-GGIM.

Conference for Asia and the Pacific (UNRCC-AP), Bangkok 2012). The Committee shall operate under the purview of the United Nations Regional Cartographic Conference for Asia and the Pacific (UNRCC-AP) and submit its report as well as recommendations to the Conference.
Article 3 Aim

The Committee shall identify regional issues relevant to geospatial information management and take necessary actions on them for the furtherance of the discussions in UNRCC-AP the annual plenary meeting of the Committee, and thus contribute to the discussions in the UNCE-GGIM so that the economic, social and environmental benefits of geospatial information will be maximized in Asia and the Pacific region.

Article 5 Objectives

The Committee shall endeavor to achieve the following objectives in the context of regional geospatial information management:

- To enhance the coordination and dialogue amongst national surveying cadastre and mapping organizations (NMCOs) and national geospatial information authorities, and relevant international, regional and country-level practice and institutions.
- To establish and promote the necessary institutional arrangements and frameworks that enable NMCOs and NGIAs of member countries to develop and reach a level of geospatial consistency and maturity.
- To develop strategies and guidelines for the establishment of an authoritative source of geospatial information by NMCOs and NGIAs of the member countries.

As we have WG 4 on cadastre and land management, it would be more appropriate to use Cadastre here like what had been adopted by some countries in the past. Hence the acronym NCMO is used sequently.
Article 6 Liaison with other International Organizations
