

## Legal and Policy Issues and Challenge Impacting Data Sharing and Data Dissemination in China

Wang Qian

Dept. of Geospatial Information and Maps  
National Administration of Surveying, Mapping and Geoinformation (NASG)

## Legal and Policy

### Surveying and mapping law(revision in 2017)

System of summarizing and submitting surveying and mapping results  
Consultation system of surveying and mapping results use  
Data integration system

### The platform for action to promote the development of big data (in 2015)

The first authoritative, systematic document  
The core of the platform for action is to promote data sharing  
To achieve cross-departmental, cross-regional, cross-hierarchical, cross-system  
data exchange and sharing

### Interim measures on sharing of government information resources (in 2016)

To standardize the sharing of information resources between government  
departments

2

## Issues and Challenge

---

### No special geoinformation sharing regulation at the national level

the first special regulation of geoinformation sharing in China :  
administrative measures on geospatial data exchange and sharing of zhejiang province

#### Reason:

- Data is scattered across multiple units
- Different standards
- Sharing foundation is unbalanced
- Division of interests and industry barriers
