

Expert Group on Land Administration and Management

Work session

Deqing - September 26th, 2018

Co-chairs:

Kees de Zeeuw - The Netherlands

Silvano Tjong-Ahin - Surinam

UN-GGIM

United Nations Committee of Experts on
Global Geospatial Information Management

Expert Group on
Land Administration and Management

Positioning geospatial information to address global challenges

ggim.un.org

A framework for sustainable land administration

... shall describe key principles for a sustainable and interoperable land administration and management system that can efficiently and effectively document, record and recognise people-to-land relationship in all its forms ...

Step 1: Vision statement

14 -14.30 hrs

A framework for sustainable land administration

... will support efforts to improve and accelerate the proportion of global population's relationship to land that will be documented, recorded and recognised (SDGs Indicator 1.4.2 – Proportion of total adult population with secure tenure rights to land, with legally recognized documentation and who perceive their rights to land as secure, by sex and by type of tenure).

Vision

Integrated Geospatial Information Framework

“The efficient use of geospatial information by all countries to effectively measure, monitor, and achieve sustainable social, economic and environmental development – leaving no one behind”.

What is the specialization for Land Administration and Management?

Group 3

Group 4

Requirements

Collect Once, Use Multiple Times

support the culture of sharing and collaboration

Maintenance

support the culture of Maintenance

Avoid duplication

in data acquisition and management

International Standards & Interoperability

applies internationally agreed standards

Inclusive and recognises all forms of tenure

in scope and cover all tenure and all land

Accessible & Transparent

easy accessible and supports transparency

Data Security

support data security in frameworks and policies

Capacity Development

facilitate capacity development
