

# **A national perspective on legal and policy frameworks for geospatial information management**

UN-GGIM – Working Group on Legal and Policy Frameworks for  
Geospatial Information Management  
17-18 November 2018, Deqing, China

Deputy Director General Mr. Petri Korpinen  
National Land Survey of Finland

# Report on Spatial Data Policy

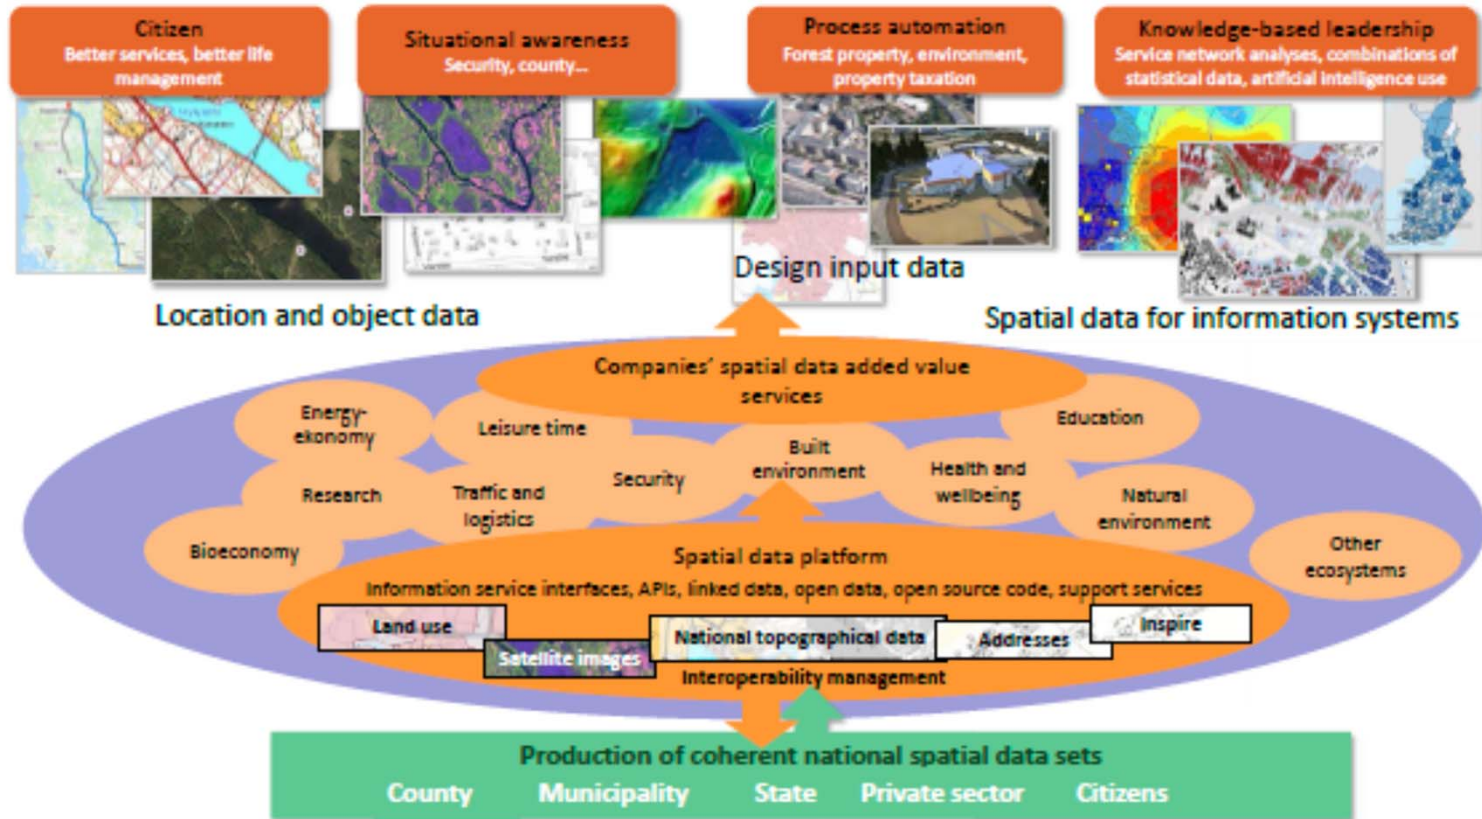

- The report on spatial data policy discusses the types of spatial data needed in society, how their production, management and distribution is developed, and how their use is promoted.
- The aim of the report is to oblige all actors in the public sector to see to the interoperability of spatial data and access to it in a way that they can be used by the public authorities and companies as efficiently as possible.
- At the same time a high standard of information security and personal data protection must be ensured.
- To be completed in November 2018.
- Guidelines of who will provide, use and refine spatial data.
- The report includes 7 development measures:

# The report's development measures and their areas of influence

# An outline of the spatial data ecosystem

## Spatial data ecosystem

# More information
