Overview List of Documents

The United Nations Committee of Experts on Global Geospatial Information Management (UN-GGIM), in collaboration with the Government of Mexico through Instituto Nacional de Estadística y Geografía (INEGI) will convene the Seventh High-level Forum on United Nations Global Geospatial Information Management with the theme **"Accelerating Implementation: Achieving Resilience"** in Mexico City from 8 - 10 October 2024. This seventh edition of UN-GGIM's High-level Forums will continue UN-GGIM's regular high-level, multi-stakeholder discussions on global geospatial information management, through the convening of global forums, aimed at promoting comprehensive dialogue among Member States, and between Member States and relevant international organizations, UN system entities, and stakeholders.

At its thirteenth session in August 2023, the Committee of Experts, with decision 13/101, welcomed the offer of the Government of Mexico, through its National Institute of Statistics and Geography, to host the Seventh High-level Forum in Mexico City in October 2024 and confirmed the support of the Committee of Experts in the development and implementation of the programme of the Forum. The Seventh High-level Forum has the substantive support from each of the five Regional Committees of United Nations Global Geospatial Information Management (UN-GGIM: Africa, UN-GGIM: Americas, UN-GGIM: Arab States, UN-GGIM: Asia and the Pacific, and UN-GGIM: Europe), as well as the functional groups and thematic networks of the Committee of Experts.

An advisory committee has been established to develop and promote a compelling substantive agenda for the High-level Forum with high-level keynote and plenary presentations for the three days. Additional information including an outline of the substantive programme, local arrangement and logistical information will be provided on this website when available.

About

The United Nations Statistics Division is committed to the advancement of the global statistical system. We compile and disseminate global statistical information, develop standards and norms for statistical activities, and support countries' efforts to strengthen their national statistical systems. We facilitate the coordination of international statistical activities and support the functioning of the United Nations Statistical Commission as the apex entity of the global statistical system.

UNSD Work Programme
