

Committee of Experts on Global Geospatial Information Management

Tenth session

New York, 26- 27 August 2020 and 4 September 2020

Item 6 of the agenda

Global geodetic reference frame (for discussion and decision)

<i>Statement provided by:</i> Denmark	
<i>Statement:</i> Denmark welcomes and fully supports the offer from Germany to host the Global Geodetic Centre of Excellence to be established in the UN Campus Bonn. The role of GGCE to enhance global cooperation and coordination across Member States and relevant geodetic stakeholders, strengthen geodetic infrastructure, as well as support UN Member States in improving their national contributions to the global geodetic infrastructure - in line with international standards, policies and conventions - is important and welcomed. For the further definition of the programme of work, we look forward to the direct coordination with the Committee of Experts, as agreed at the ninth UN-GGIM session.
