

# Committee of Experts on Global Geospatial Information Management

## Tenth session

New York, 26- 27 August 2020 and 4 September 2020

Item 4 of the agenda

### Contribution of regional committees and thematic groups to the global geospatial information agenda (for information)

<i>Statement provided by:</i> Sweden	
<i>Statement:</i> Sweden would like to express its congratulations to all the regional entities and thematic groups for their work since the ninth UNGGIM meeting. A key challenge to ensure that UNGGIM is successful is to have active and relevant regional entities and thematic groups. Key results from our expert and working groups as well as thematic groups should be implemented in the member countries and to do that we need to have strong and active regional entities. We are fortunate in Europe to have such an entity, where we have been able to combine spatial information and statistics. Sweden would like to ensure the meeting that we will continue to support this development and encourage other member countries to do the same in their respective regional entity.
