

Committee of Experts on Global Geospatial Information Management

Tenth session

New York, 26- 27 August 2020 and 4 September 2020

Item 7 of the agenda

Geospatial information for sustainable development (for information)

<i>Statement provided by:</i> MEXICO	
<i>Statement:</i> Achieving sustainable development requires policies that are based on proper evidence and data, including geospatial information. The present circumstances created by the COVID19 pandemic, reinforce that need, given that the degradation of ecosystems facilitates phenomena as the zoonosis; the jump of infectiuous agents from Nature to Man. The continued cooperation between countries, organizations and agencies is also essential to produce, share and disseminate geospatial information for sustainable development. Mexico INEGI (Rodolfo Orozco Gálvez)
