

Committee of Experts on Global Geospatial Information Management

Tenth session

New York, 26- 27 August 2020 and 4 September 2020

Item 9 of the agenda

Application of geospatial information related to land administration and management (for discussion and decision)

Statement provided by:

P.R.China

Statement:

China acknowledges the Framework of Effective Land Administration (FELA) is a remarkable success of the Expert Group on Land Administration and Management for the past two years. Thanks for the efforts and dedication of the co-chairs and related experts.

China suggests that global, regional and national activities for FELA dissemination and education could be scheduled by various applicable ways, such as webinars, workshops and field learning by doings. Regarding learning by doing, a program aimed at recording the different model cases based on FELA guidance with various country contexts, could be initiated after the adoption of FELA. The model cases could focus on the comparative progress relative to the original status, rather than the absolutely advanced cases.
