

Committee of Experts on Global Geospatial Information Management

Tenth session

New York, 26- 27 August 2020 and 4 September 2020

Item 9 of the agenda

Application of geospatial information related to land administration and management (for discussion and decision)

<i>Statement provided by:</i> UN-GGIM-AP	
<i>Statement:</i> UN-GGIM-AP would like to appreciate the Expert Group on Land Administration and Management for the work and effort in development and formulation of the Framework for Effective Land Administration and for the visible progress made for the land management sector. In particular, UN-GGIM-AP recognizes that the global consultation process involving member states and stakeholders was very important to make the FELA in describing why good land administration is necessary and crucial part in reaching the sustainable development goals. UN-GGIM-AP believes that stronger participation and responses from the member states to the consultation process ensured the global perspective of the framework. UN-GGIM-AP further supports the framework as a living document to be periodically reviewed and updated to suit global circumstances considering the political, societal, economic, environmental and technological landscape. UN-GGIM-AP wishes to be a partner for, and continue being active on the Expert Group on Land Administration and Management in the future development of the document.
