

Committee of Experts on Global Geospatial Information Management

Tenth session

New York, 26- 27 August 2020 and 4 September 2020

Item 11 of the agenda

Marine geospatial information (for discussion and decision)

<i>Statement provided by:</i> Philippines	
<i>Statement:</i> <i>The Philippines recognizes the efforts of the Working Group in exploring the issues, challenges, and benefits of making available and providing access to marine geospatial spatial information. The Philippines' national mapping agency's unique setup, one of the few NMAs in the world responsible for both terrestrial and maritime functions, can take advantage of the learnings from these exercises to enhance its marine geospatial information management.</i> <i>We also take note of the working groups initiative to develop a reference document for effective and integrated marine geospatial information management building on the progress of the IGIF.</i>
