SSA – Sub-Sahara Africa
ECA – Europe and Central Asia
LAC – Latin America and the Caribbean
MNA – Middle East and North-Africa
SAS – South Asia
EAP – East Asia and the Pacific
UN GGIM Expert group on Land Administration and Management (UN-EG-LAM)

• Play a leading role at the policy level by raising political awareness and highlighting the importance to decision makers of the need for timely and fit for purpose land administration and management and;

• Encourage the use of geospatial information tools and systems to improve the legal certainty of all citizens in the world with respect to the registration of the relation between people and land.
A framework for sustainable land administration

... shall describe key principles for a sustainable and interoperable land administration and management system that can efficiently and effectively document, record and recognise people-to-land relationship in all its forms ...
1. Part - High Level
with vision statement,
goals, objectives and/or
expected outcomes

2. Part - Components
or pillars of the framework
based on the requirements that
lead to giving access to a
knowledge base and then
leading to a series of priority
actions and partnerships
Requirements

Collect Once, Use Multiple Times
support the culture of sharing and collaboration

Avoid duplication
in data acquisition and management

Inclusive and recognises all forms of tenure
in scope and cover all tenure and all land

Data Security
support data security in frameworks and policies

Maintenance
support the culture of Maintenance

International Standards & Interoperability
applies internationally agreed standards

Accessible & Transparent
easy accessible and supports transparency

Capacity Development
facilitate capacity development

UN-GGIM | United Nations Committee of Experts on Global Geospatial Information Management | Expert Group on Land Administration and Management
6 Pillars as the basis of the Framework?

- Responsible Governance
- Concept of the Continuum
- Fit-For-Purpose Land Administration
- Finance
- Assessment and Monitoring
- Capacity and Partnership
Conclusion

• Land administration affects many SDG’s

• Both urban and rural big challenges to meet the SDG’s

• Academic and global input is required for the development of a global framework on Land Administration
