United Nations Committee of Experts on  
Global Geospatial Information Management

Expert Group on  
Land Administration and Management

*Positioning geospatial information to address global challenges*

[ggim.un.org](http://ggim.un.org)

# The pathways: Finance and Data

### Cost

- Development
- Operation and management
- Fit for purpose (from 1\$ per parcel to 500\$ per border)

### Revenue

- Return on investment
- Business models
- Tax income

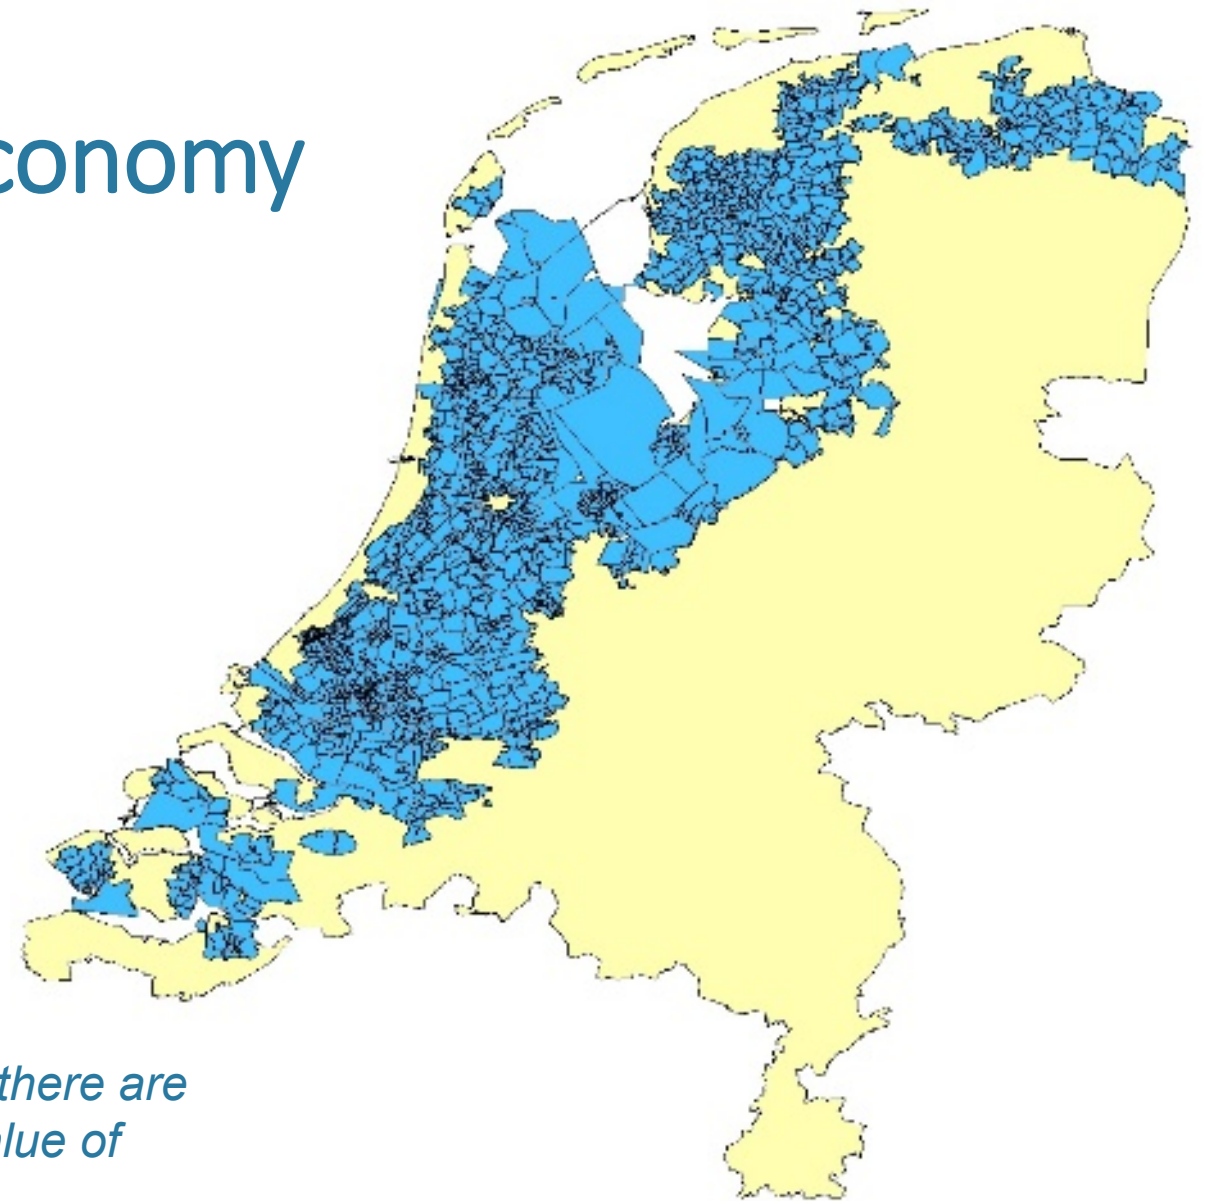

### Indicators, Standards, Tools and Measurement

- Costing and Financing of Land Administration Services (CoFLAS)
- Valuation of property and land
- Land Based Finance (LBF)
- International Finance Corporation (IFC) Standards

# The value of land in an economy

(Example from The Netherlands)

*Postal codes lying under sea level. Totally there are 3.058.102 constructions with a common value of more than € 711 billion (data of 2013).*

# FELA

## Data

- Land tenure, land use, land value, and land development
- Supply chains for  
Organizing, planning, acquiring, integrating, managing, maintaining, curating, publishing and archiving
- FELA calls for enablement of  
Custodianship, acquisition, management, supply chain, curation, and delivery strategies and mechanisms

# Land administration data and the SDG's

(Example from The Netherlands)
