Everything happens at a place or location

Loc-I is the missing piece of the puzzle to connect society, economy and the environment layers

Enabler for linking spatial and non-spatial data

The Location Index creates a system to support:

- Decisions based on fit for purpose data with
- Known authoritative sources
- Using best technology and
- Available on demand from a device of choice

How do we use the IGIF for Location Index?

Value proposition

Institution arrangements

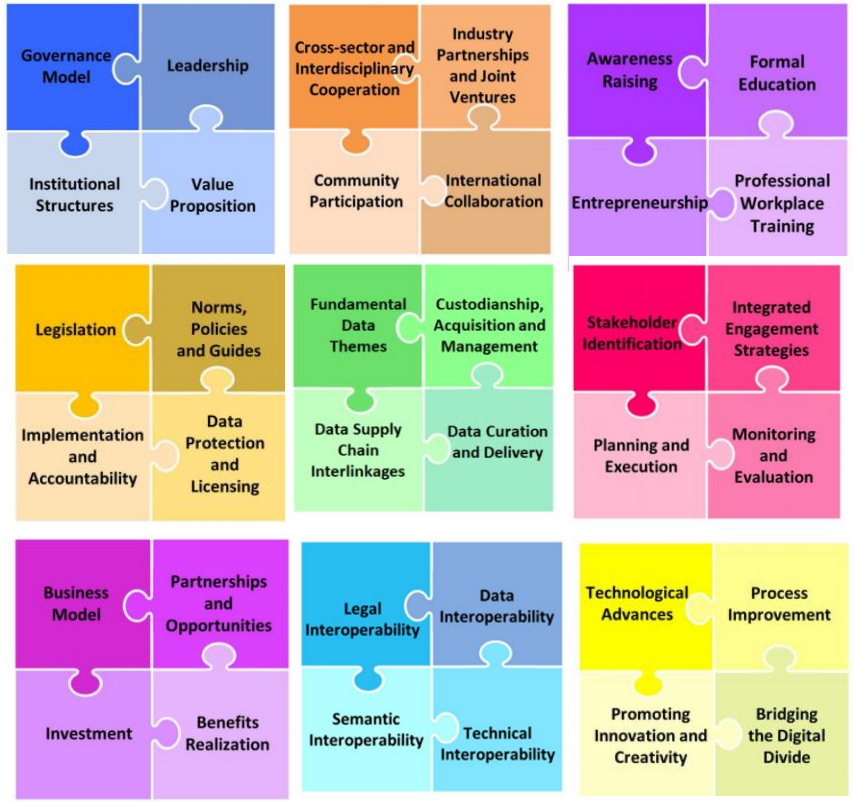
Privacy and security

Fit to broad data policy

Links by geographies

Define business case

Get ongoing funding



Build ‘spatial maturity’ of policy makers, application developers, etc

Marketing and promotion

GIS without GIS

“Break free” of traditional spatial data management issues
