

## Sixth Session of the Committee of Experts on UN-GGIM

### SIDE EVENT

## Modernization of Field Operations for In-Situ Data Collection

**Monday, August 1, 2016**  
**11:00 am - 12:45 pm**  
**Venue: Conference Room 5**  
**United Nations, New York**

---

### Objectives

The side event is organized by Esri, in collaboration with UNSD, to inform Member States delegates and Observers as to the value of the Integration of Statistical and Geospatial Information. In the coming years, National Mapping Agencies and National Statistical Organizations will be engaged in collecting more and more in-situ information. Drivers for this largely due to the forthcoming 2020 Round of the Census whereby essential demographic and population data will be collected; improved positional information on handheld devices; and the requirements for the Sustainable Development Goal Data Indicators – as much of this data needs to be collected at the household or district level. Further analysis and aggregation of this in-situ data will result in better sustainable development solutions.

### Case Study:

Needs for good field data collection tools, addressing, and district maps for the Polio Campaign Monitoring in Iraq (Relates to: SDG#3 - Good Health and Well-Being).

### Draft Agenda:

**Moderator:** Mr. Amor Laaribi, UNSD/UN-GGIM Secretariat

1. **Ms Linda Peters**, Business Development, Mapping | Statistics | Imagery, Esri (45 minutes)
2. **Mr. Jawameer Kakakahan** (invited), World Health Organization, Iraq Country Office (30 minutes)
3. **Discussion and Conclusions** (30 minutes)

***“This is an open workshop and all Session Attendees are invited”***
