SHORTLIST

Indicator

- 2.4.1 Proportion of agricultural area under productive and sustainable agriculture
- 6.3.2 Proportion of bodies of water with good ambient water quality
- 6.5.2 Proportion of transboundary basin area with an operational arrangement for water cooperation
- 6.6.1 Change in the extent of water-related ecosystems over time
- 9.1.1 Proportion of the rural population who live within 2 km of an all-season road
- 9.c.1 Proportion of population covered by a mobile network, by technology
- 11.2.1 Proportion of population that has access to public transport, by age, sex and persons with disabilities
- 11.3.1 Ratio of land consumption rate to population growth rate
- 11.7.1 Average share of the built-up area of cities that is open space for public use for all, by sex, age etc
- 14.2.1 Proportion of national Exclusive Economic Zones managed using ecosystem-based approaches
- 14.5.1 Coverage of protected areas in relation to marine areas
- 15.1.1 Forest area as a proportion of total land area
- 15.1.2 Proportion of important sites for terrestrial and freshwater biodiversity that are covered by protected areas, by ecosystem type
- 15.3.1 Proportion of land that is degraded over total land area
- 15.4.1 Coverage by protected areas of important sites for mountain biodiversity

sublist A

geospatial data is needed

Indicator	
1.1.1	Proportion of population below the international poverty line, by sex, age, employment status and geographical location (urban/rural)
1.4.2	Proportion of total adult population with secure tenure rights to land, by sex and by type of tenure
4.5.1	Parity indices (female/male, rural/urban etc as data become available)
5.2.2	Proportion of women and girls aged 15 years and older subjected to sexual violence, by age and place of occurrence
5.4.1	Proportion of time spent on unpaid domestic and care work, by sex, age and location
5.a.1	a. Proportion of total agricultural population with ownership or secure rights over agricultural land, by sex; and (b) share of women among owners or rights-bearers of agricultural land, by type of tenure
5.a.2	Proportion of countries where the legal framework (including customary law) guarantees women's equal rights to land ownership and/or control
11.7.2	Proportion of persons victim of physical or sexual harassment, by sex, age, disability status and place of occurrence, in the previous 12 months
15.4.2	Mountain Green Cover Index

- Possible to report or already being reported
- Possible to develop: data integration needed or changes to current surveys
- Very difficult to report, no current survey, no available method
- Not relevant / Global data enough

Voluntary national assessment of Member's readiness to apply geospatial information in the production of indicators

A voluntary review of readiness to utilize global and national geospatial data and satellite earth observations data sets in the production of indicators (based on the shortlist of 24 indicators)

SUB-LIST B:
GEOSPATIAL DATA CAN SUPPORT

INEGI is currently working in the implementation of the **Mexican Geospatial Data Cube**

It allows for **big data** time series analysis and will be oriented towards **calculating SDG indicators**, among other tasks...

Current tests are done for indicator **15.4.2**

Currently implementing Open Data Cube at INEGI

WORKS ON indicator 15.4.2 mountain **Green** cover index

First classification is a conversion from the 2014 Land Use/Land Cover map to 6 classes

ODC process allows constant update to the national classification because it is generated automatically

Spared resources can be applied to expert and field validation for quality assessments

STEPS (chronological)	without ODC		with ODC	
	Progress	Progress	Progress	Progress
Use Intergovernmental Panel on Climate Change definitions (6 classes)	✓	✓	✓	✓
Land Use/Land Cover Map	✓	✓	✓	✓
Obtain converted classification (original to 6 classes)	✓	✓	✓	✓
Draw sample from converted data			✓	design
Use sample and 6 other ODC indicators as training dataset for classification			✓	ODC indicator (geomedian)
Run national classification with Machine Learning			✓	
Link result raster to Digital Elevation Model (DEM) for mountain areas	✓	✓	✓	
Calculate Green Cover index on DEM mountain area mask	✓	✓	✓	
Possible field validation for quality assurance in subsampled dataset			✓	
Provide feedback to FAO	✓	✓	✓	

THANK YOU.
