SUSTAINABLE GALS DEVELOPMENT

Capital: Dakar

Population:15,850,567

Natural Increase: 2.8%

Density: 82 Inhabitants/km²

Urban Population: 46.7%

Official Language: French

Background

- **☑** 2008 2013: Implementation of the digital geospatial databases
 - Georeferencing of satellite images and maps:
 - Collecting and reporting GPS points (Latitude, Longitude) on images (urban);
 - Calibration of scanned Enumeration Area (EA).
 - Digitization of data:
 - Scanning 2000 maps;
 - Digitalization of cartographic data;
 - Quality Control;
 - Supply of socio-economic data of the cartographic base resulting from surveys and censuses.

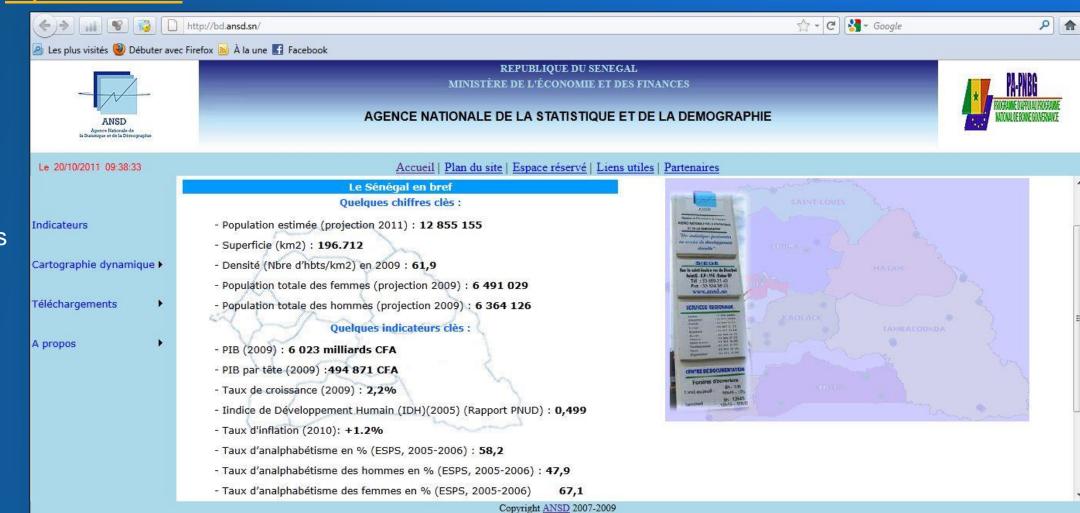

Background

☑ The GIS Portal: http://bd.ansd.sn/

Data content

- Indicators on surveys and censuses
- MDGs indicators
- Geospatial data on low social services

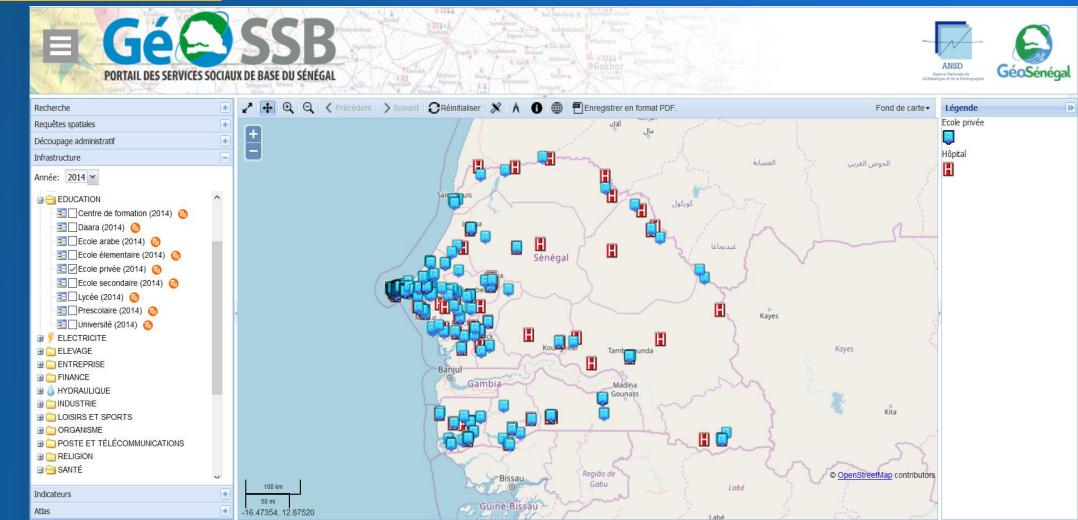

Background

Data content

- Indicators on surveys and censuses
- MDGs & SDGs indicators
- Geospatial data on low social services

SDGs - National Approach

☑ National level: **PSE** and **CASE**

- PSE: National Development Framework for economic and social policy since 2014
 - Timeframe: 2035
 - Achievement: by a Five-Year Priority Action Plan (PAP) declined in "projects, development programs".
- CASE: Harmonized Public Policy Monitoring and Evaluation Framework to facilitate:
 - Better coordination of M & E systems
 - A matrix of indicators to measure the performance of policies and commitments at different levels
 - Aligning the SDGs with the PSE (SDG & PSE coherence matrix)

SDGs - National Approach

Dakar International Conference (12 & 13 October 2016) organized by National Agency for **Statistics** and Demography (ANSD), in collaboration with the Agricultural and Rural Foresight Initiative (IPAR) and the Directorate General of Planning and Policy (DGPPE),

SDGs - National Approach

☑ Setting up groups:

Governance: Goals 16 & 17;

Social: Goals 2, 3, 4, 5

Economy: Goals 1, 7, 8, 9, 10, 12

Environment: Goals 6, 11, 13, 14, 15

- ☑ To better assess the baseline situation, based on sectoral perceptions of data availability.
- **☑** Data collection of sectoral indicators.
- ☑ Results early work, the National Statistic System (NSS) is able to provide a little more than 2/3 of the indicators SDGs (68,5%), however we note:
 - disparities by group, with social (78.5%) and economic (74.5%) being the best-informed;
 - A weak capacity to inform indicators on *Governance* and *Environment*, which could be explained by their low consideration (see shortage) by the SDGs.

☑ UNSD/Esri Research Project

- The objective of the project is to develop and deploy a new approach to monitoring SDGs using Geographic Information Systems (GIS).
- Seven (07) UN Members (pilot countries) South Africa, Australia, Ireland, Mexico, Philippines, Qatar & Senegal.
 - Participation at the REDLANDS Conference (USA) in 2017,
 - Sofwares: ArcGis Online, ArcGis Desktop, ArcGis Enterprise
- It is a federated information system based on geospatial technology with ArcGIS products.

☑ National actors

Mandate

To provide a Technical coordination of the activities in the National Statistical System (SSN) whose missions revolve around the production and dissemination of statistical data for the needs of users

Esri Senegal

Mandate

To provide GIS software edition and technical support to support its customers in the process of appropriation of GIS tools of the ArcGIS platform

Mandate

To provide a national mapping service in the State...creating and maintaining the definitive national mapping and related geographic records

✓ National actors

ANSD

Role

- Coordination of project activities
- Centralization of statistical data;
- Main Administration of the Open Data Platform

Esri Senegal

Role

- Technical Support: ArcGis Online ArcGis Hubs
- ArcGIS Product Training
- Administration of the Open Data Platform

ANAT

Role

- Production and provision of geospatial data
- Administration of the Open Data Platform

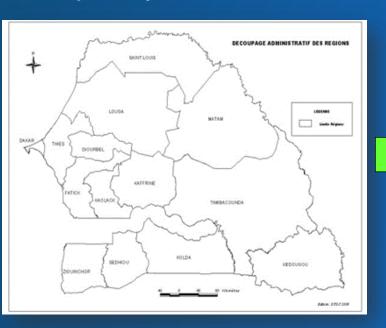

☑ Data type

ANAT

No Poverty

Goal 1: End poverty in all its forms everywhere

ODD 1.4.1 Indice d'accès aux services sociaux de base à l'échelle des régions

Objectif 1 : Éliminer la pauvreté sous toutes ses formes et partout dans le monde D'ici à 2030, faire en sorte que tous les hommes et les femmes, en particulier les pauvres et les personnes

vulnérables, aient les mêmes droits aux ressources économiques et qu'ils aient accès aux services de base, à la propriété foncière, au contrôle.

Cette couche constitue la carte web de l'indicateur ODD 1.4.1 Indice d'accès aux services sociaux de base à l'échelle des régions. Les données sont issues d'enquêtes menées par l'ANSD.

La situation de référence est approchée et fait partie de l'axe II des objectifs ciblés dans le Plan Sénégal Emergent (PSE) qui est le document de référence nationale en matière de politiques publiques.

☑ Features – APIs and Documentation

Good Healyh and Well-Being

Goal 3: Ensure healthy lives and promote well-being for all at all ages

☑ Difficulties

- Organizational for collect and monitoring SDGs indicators
 - Low availability of statistical data at the level localities (regions, departments, municipalities) which constitutes a brake for the integration of indicators and the regular monitoring of actions and programs;
 - Data collection for indicators available at the sectoral services level (Administrative records).

☑ Challenges

- Need to improve data availability for monitoring indicators;
- The challenge of Civil Records that contribute to the regular production of quality statistics;
- The challenge for every girl and woman to count;
- Challenges and opportunities of statistics environment and sustainable development;
- Challenges and opportunities of Health and social action statistics;
- Need to take into account all data sources and to properly distribute prerogatives.

☑ Challenges

- Strengthen the capacity of the NSS for the production of data including governance and environment;
- Produce regular disaggregated data;
- To take the opportunity of the existence of the CASE and the PSE to facilitate the integration and monitoring
 of the SDGs in public policies;
- Promote data sharing with <u>Big data</u>: OPAL and Humanitarian OpenStreetMap Team (HOT);
- Easy access to data for users.

☑ Takeaways

- Measuring & Monitoring SDGs indicators
 - Establishment of a national roadmap on the SDGs
 - Establishment of national committees for monitoring SDGs indicators
 - Methodology for collecting available, informative indicators
 - Capacity building on data conditioning relevant to mapping and monitoring of SDGs indicators

- Improvement of the Open Data Site Portal
 - Story map ,
 - Operation Dashboard,

Thank you!

Merci!

谢谢!
