Apply RCNN to Count No. of Bike

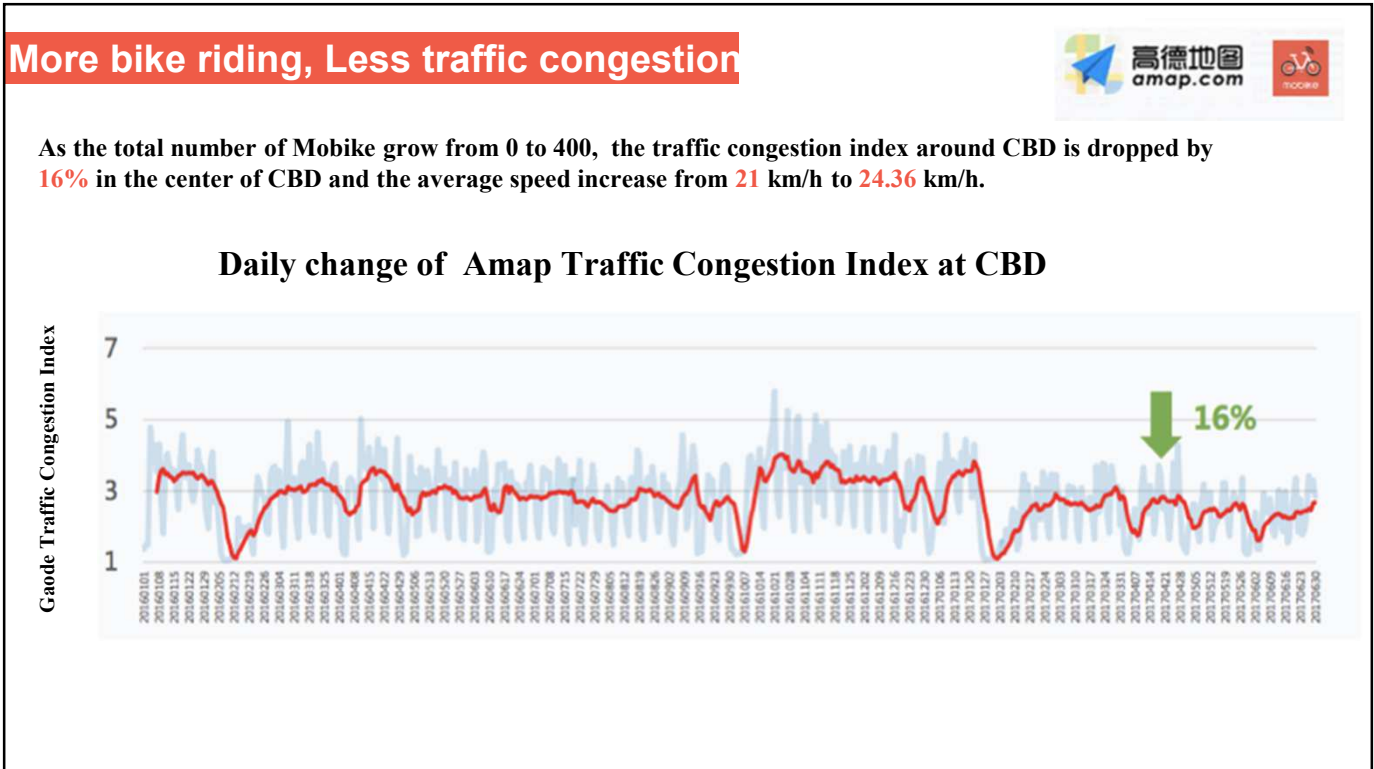

Application of Geofencing

The screenshot shows a web application for geofencing in Beijing. The interface includes a sidebar with search and filter options, and a main map area displaying various locations marked with blue pins. The sidebar contains the following elements:

- 北京** (Beijing)
- 请输入名称:
- 例如: xxx小区, xxx地铁站等
- 请选择区域种类:
 - 小区
 - 地铁站
 - 商场
 - 学校
 - 景区
 - 禁停区域
 - 其他
- 请在填写完以上信息后在地图上画出相应位置坐标
-

The main map area displays a grid of streets and various locations marked with blue pins. The map is titled "围栏坐标抓取" (Geofencing Coordinate Capture). The map shows a dense urban area with many buildings and streets. The pins are placed at various locations, indicating the geofencing points.

Social Impct

The relationship between shared bikes and metro stations (Wuhan)

Top 5 Metro Station:

1. Hanjianglu
2. Dazhifu
3. Hanzhengjie
4. Wushenglu
5. Liuduqiao

Fill the Gap of public transit service

mobike 摩拜单车

A joint study by Baidu Map and Mobike shows **shared bikes can fill the gap of public transit.**

The prevalence of shared bikes improved convenience of public transport. In Beijing, **92.7%** population are covered.
