

# KSA Geospatial Industry Journey

General Authority for Survey & Geospatial Information  
Saudi Arabia

Presented by :  
BADER ALHARBI

# Geospatial Data

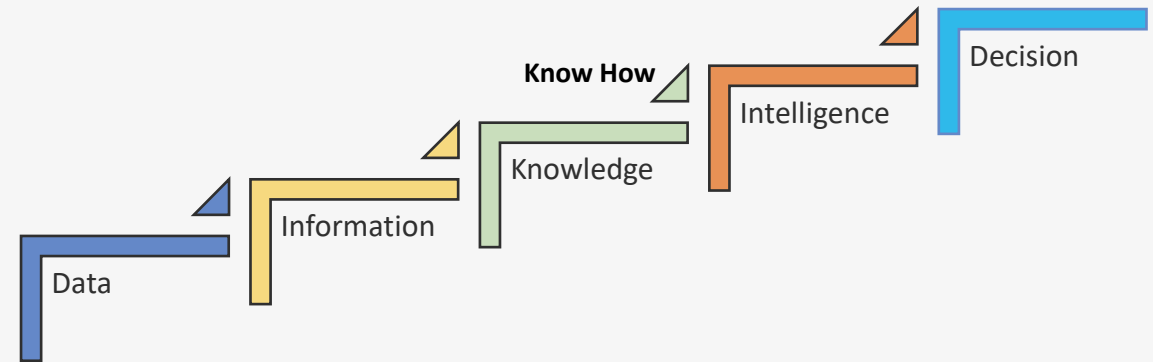

Geospatial, location data for a better world

**SUSTAINABLE DEVELOPMENT GOALS**  
17 GOALS TO TRANSFORM OUR WORLD

<b>1</b> NO POVERTY	<b>2</b> ZERO HUNGER	<b>3</b> GOOD HEALTH AND WELL-BEING	<b>4</b> QUALITY EDUCATION	<b>5</b> GENDER EQUALITY	<b>6</b> CLEAN WATER AND SANITATION
<b>7</b> AFFORDABLE AND CLEAN ENERGY	<b>8</b> DECENT WORK AND ECONOMIC GROWTH	<b>9</b> INDUSTRY, INNOVATION AND INFRASTRUCTURE	<b>10</b> REDUCED INEQUALITIES	<b>11</b> SUSTAINABLE CITIES AND COMMUNITIES	<b>12</b> RESPONSIBLE CONSUMPTION AND PRODUCTION
<b>13</b> CLIMATE ACTION	<b>14</b> LIFE BELOW WATER	<b>15</b> LIFE ON LAND	<b>16</b> PEACE, JUSTICE AND STRONG INSTITUTIONS	<b>17</b> PARTNERSHIPS FOR THE GOALS	<b>SUSTAINABLE DEVELOPMENT GOALS</b>

Moving from one step to another needs more:  
Human resource, technology, policy,  
standard.....etc

# General Authority for Survey & Geospatial Information (GASGI)

Regulate, develop, supervise, and monitor the Geospatial Sector in KSA.

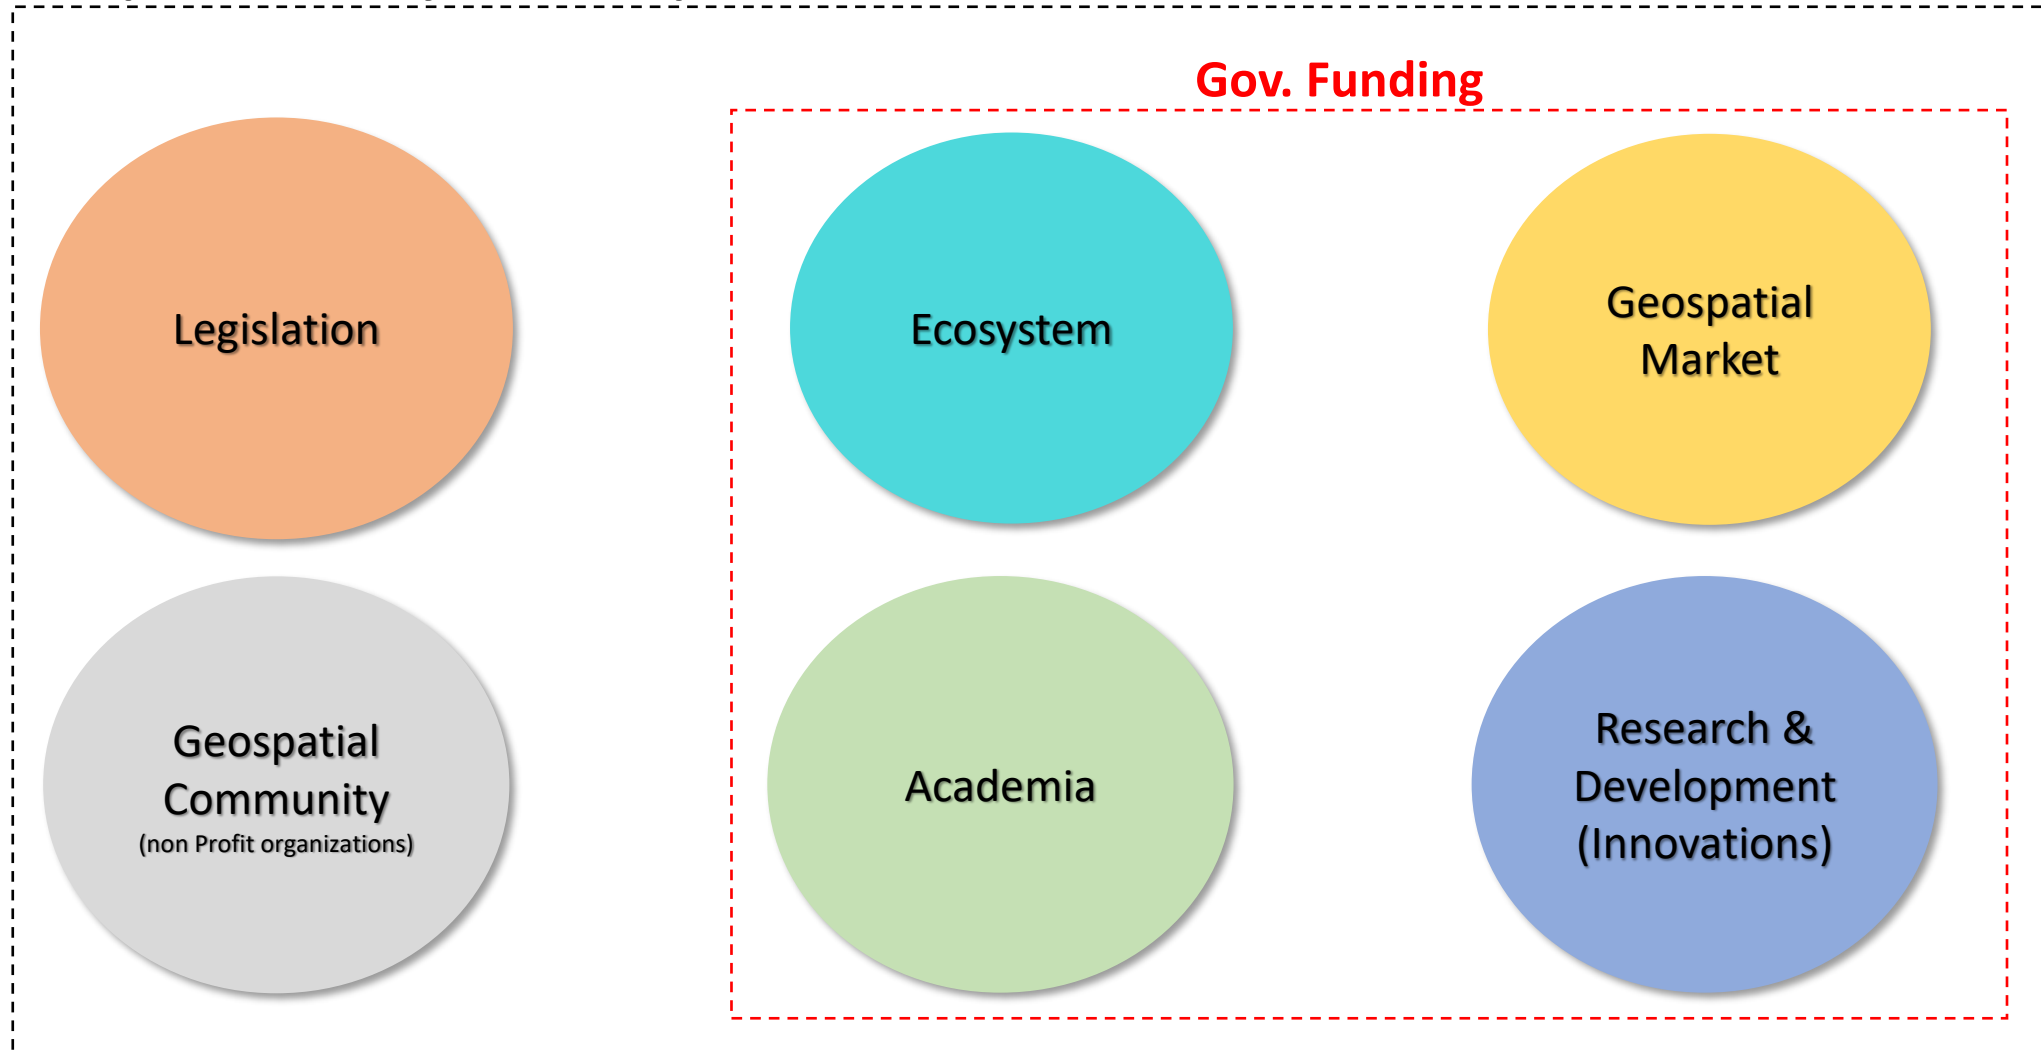

## GASGI's Responsibility :

- Support and enabling the **Kingdom's Vision 2030** goals and other national strategies
- Enhanced engagement for utilization of integrated geospatial information
- Support the transformation and the national digital economy
- **Accelerating economic growth**, improving productivity and technological advancement in all sectors
- Encouraging and **supporting innovation** and creativity in the geospatial information sector

# Journey to Building Geospatial Industry

## Geospatial Industry main components

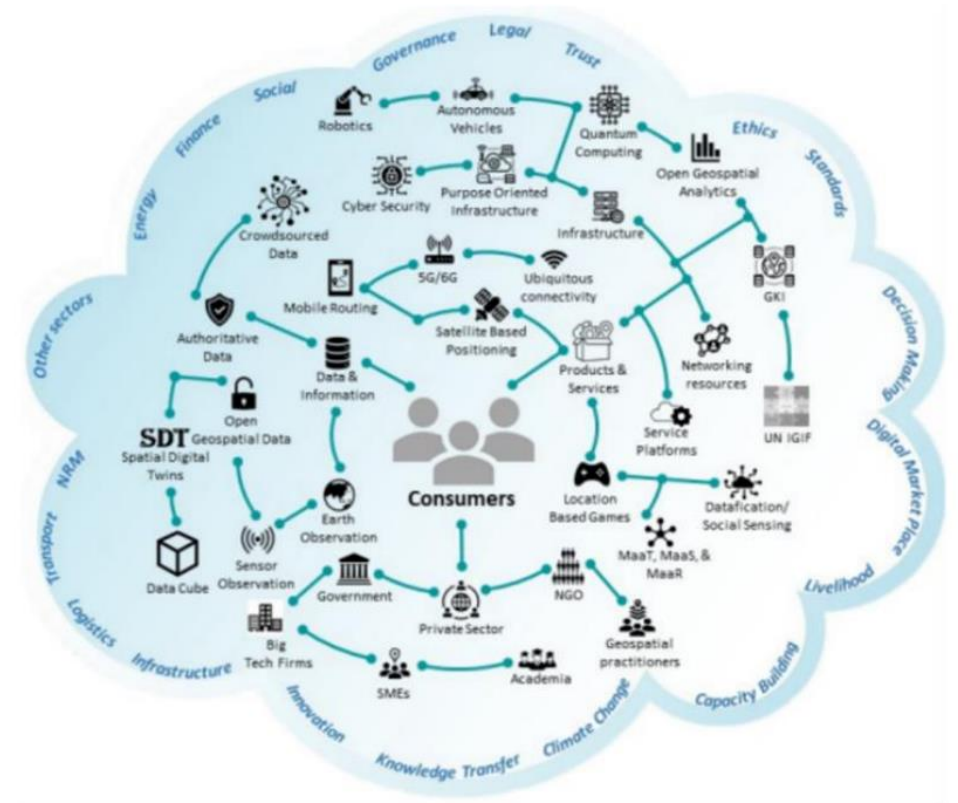

# Why ecosystem

- The global geospatial community is on a learning stage.
- Geospatial knowledge for better decision making

Data -> Information -> knowledge

- Different geospatial data and different geospatial data producers tell us that an integrated system is the best methodology so far.

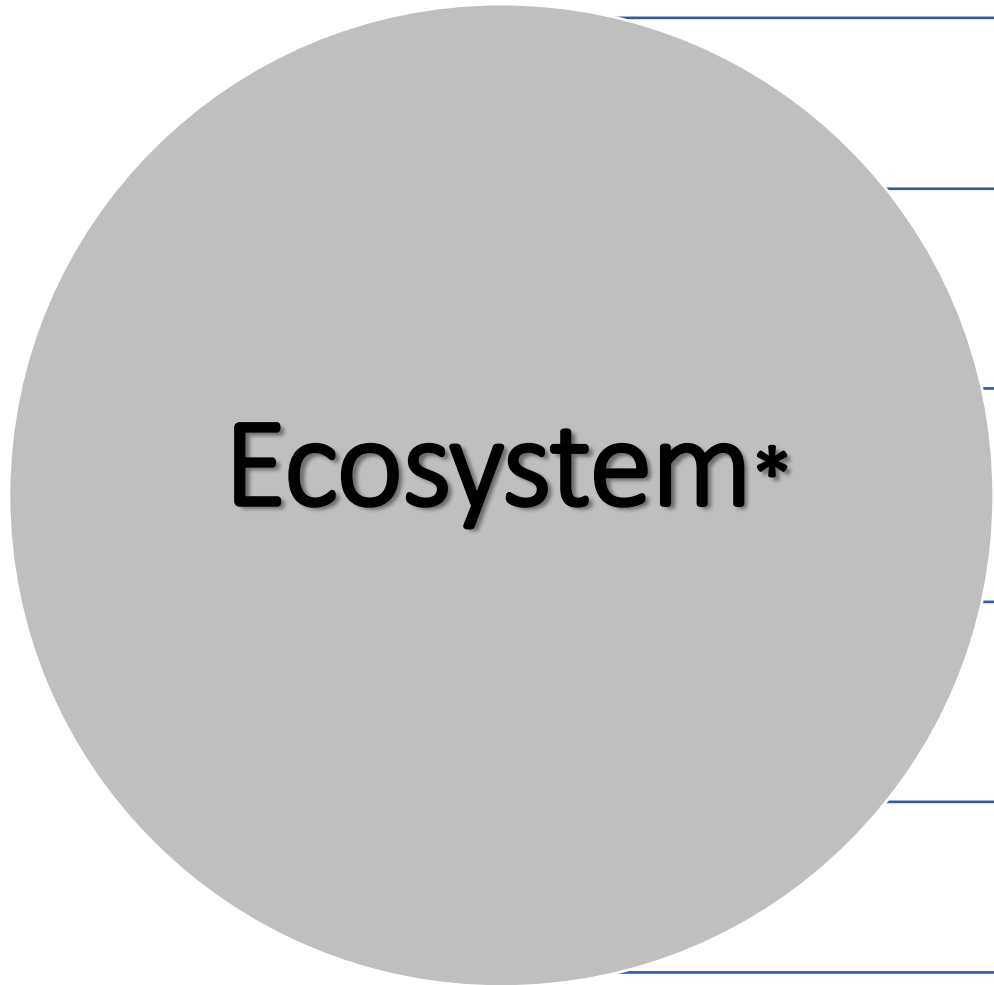

Geospatial ecosystems are logically subsets of wider digital information ecosystems, and typically comprise a multitude of stakeholders, not only government data providers, but a much wider range of organizations, individuals, and machines.\*

\*The paper “Towards a sustainable geospatial ecosystem beyond SDIs” by Coetzee et.al1 , presented to the 11th session of UN-GGIM explains Geospatial ecosystem “as a system in which a community of actors (individuals or organizations and increasingly ‘intelligent’ machines) interacts via the geospatial information and technologies in their environment. Similar to natural ecosystems, the geospatial ecosystem is dynamic

# Journey to Building Geospatial Industry

- Governance
- Standards
- Policies
- Platform
- Capacity Building

Open Data

Digital Twin

Geospatial Analysis

Artificial Intelligence

Geospatial Technology

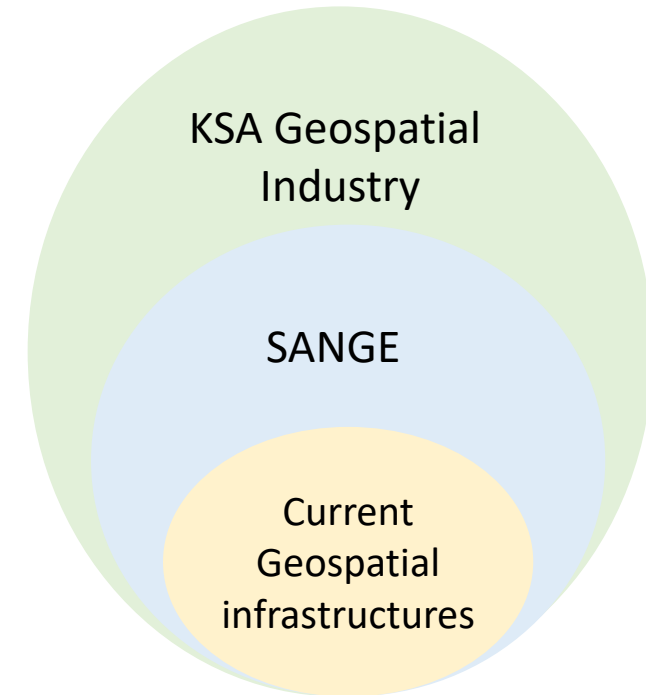

\* Ecosystem has much more components, this is an examples of what GASGI started

# Saudi Arabian National Geospatial Ecosystem (SANGE)

## How?

- **strategic initiative** of GASGI with an intent for establishing a **sustainable, active, and nationally relevant** Geospatial Ecosystem that contributes to all activities and applications which require any element of geospatial knowledge.

# Saudi Arabian National Geospatial Ecosystem (SANGE)- a glance

- One of strategic goals for General Authority for Survey & Geospatial Information(GASGI) is enhancing Geospatial Industry in SA by developing SANGE as a first phase:

**Data**

**Standards**

**Policies**

**Legislations**

**Governance**

 **SANGE**

**Technologies**

**Capacity Building**

**Geospatial Community**

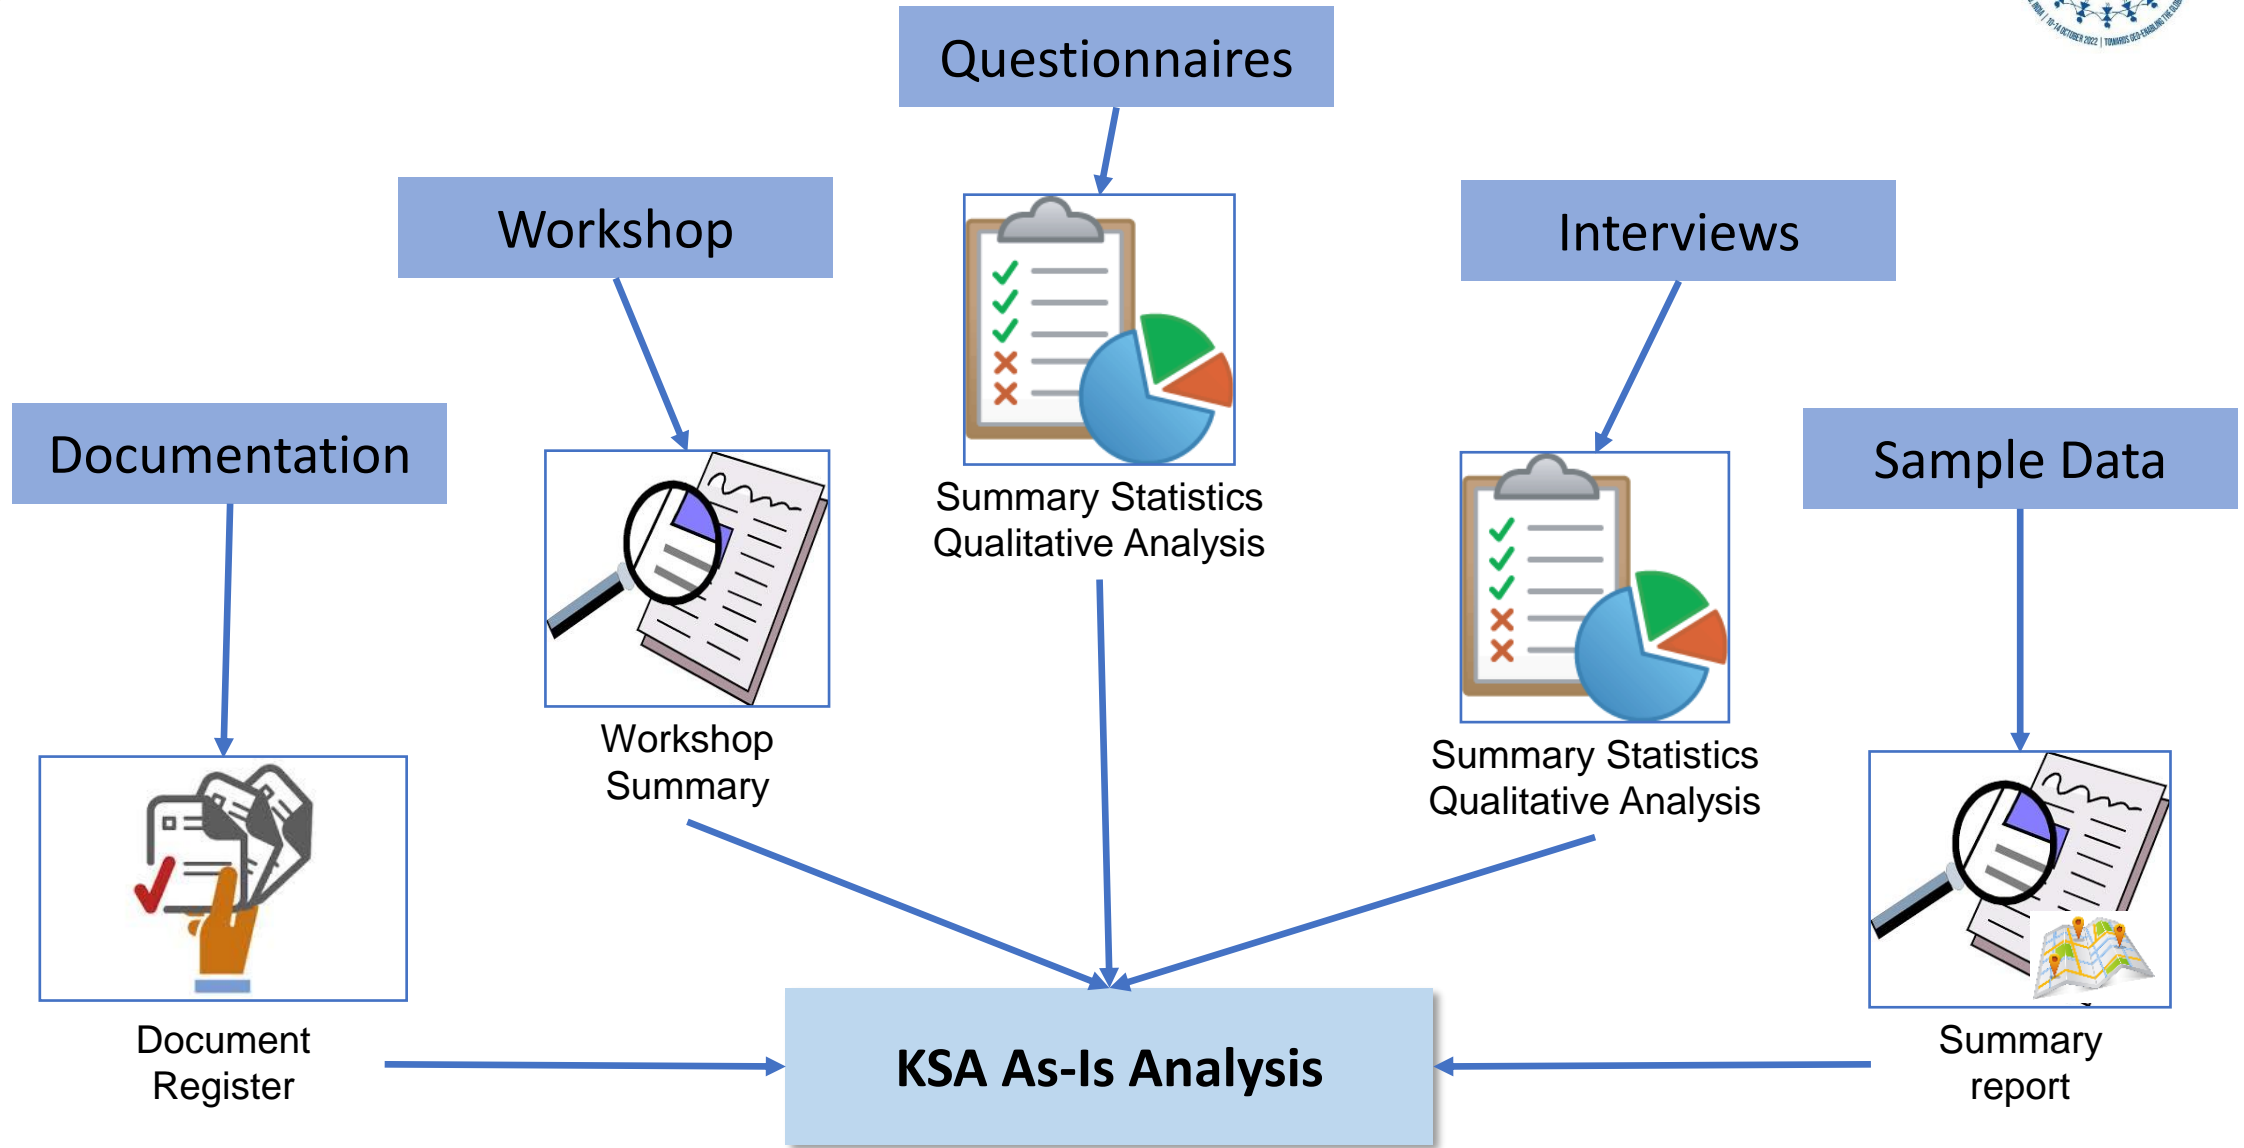

**Geospatial Market**

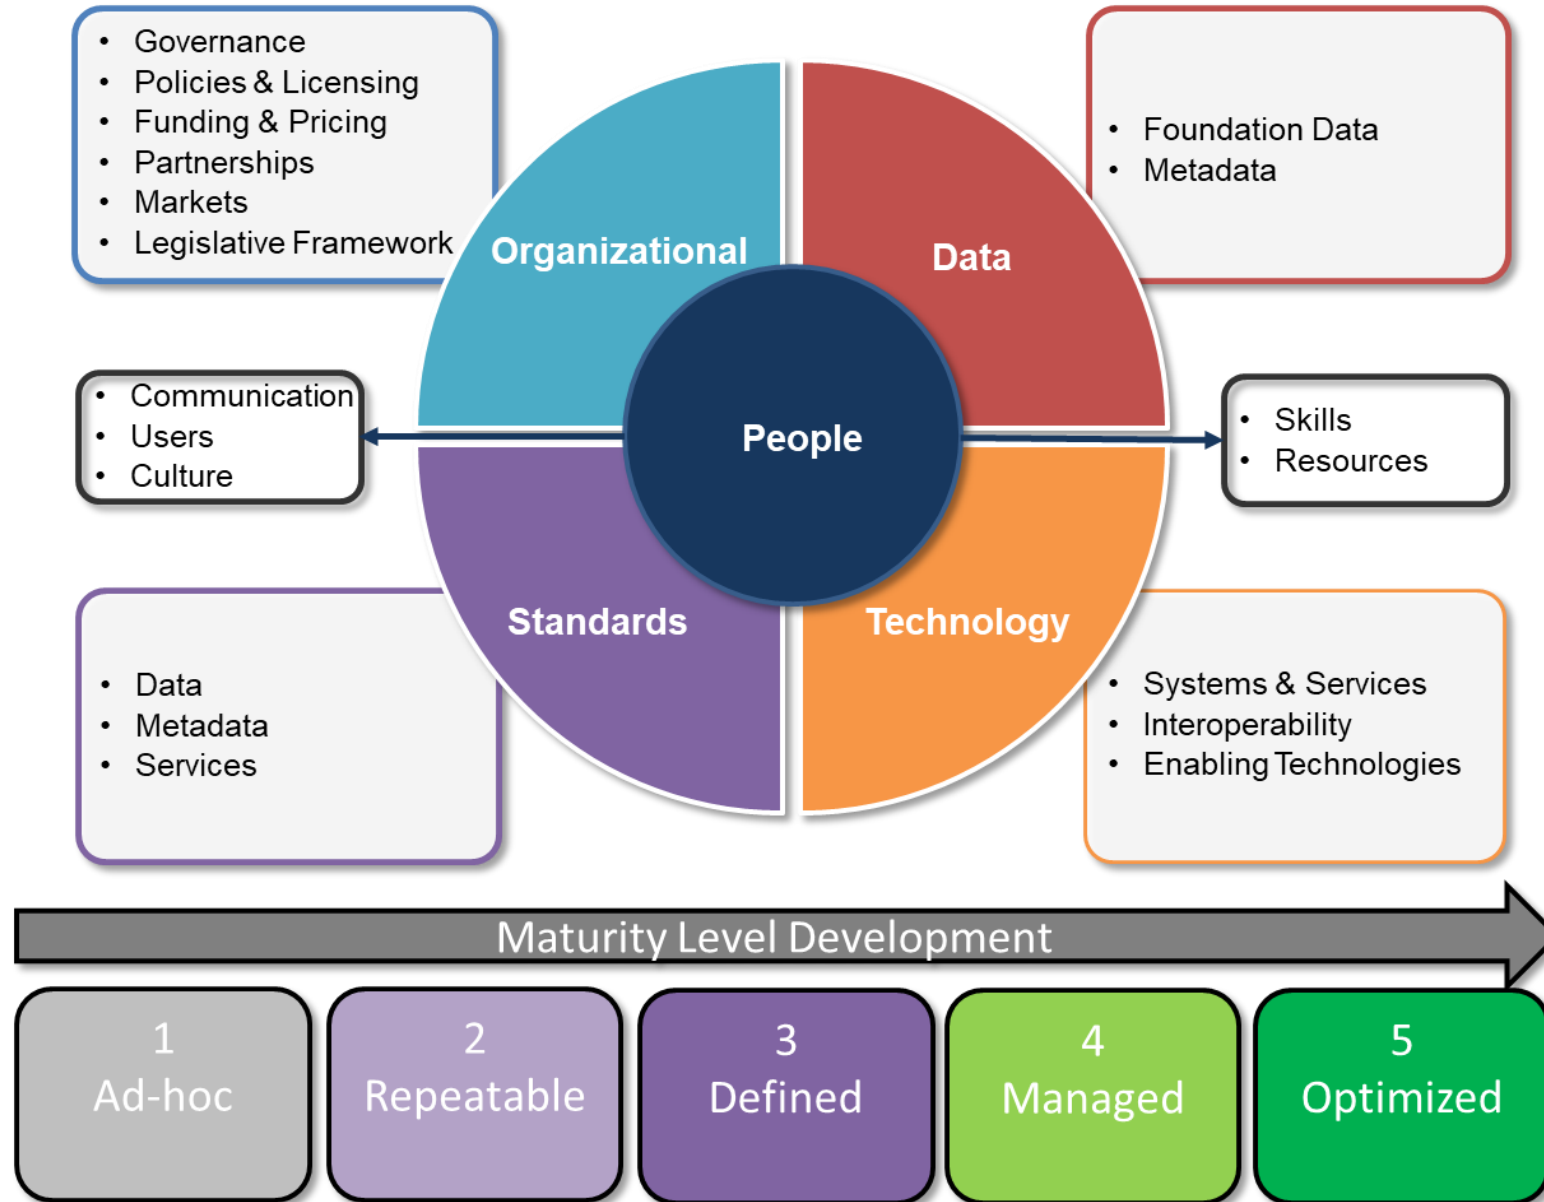

**Research & Development**

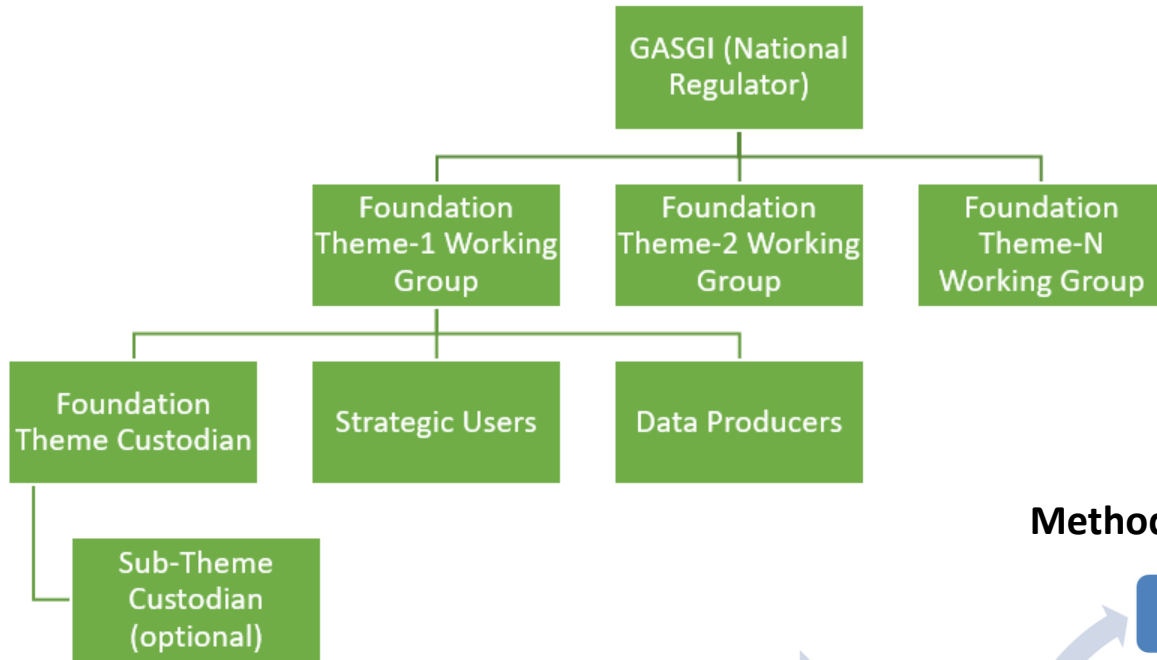

# Start: KSA As-Is Analysis Study

# Geospatial Infrastructure Components – Maturity Levels

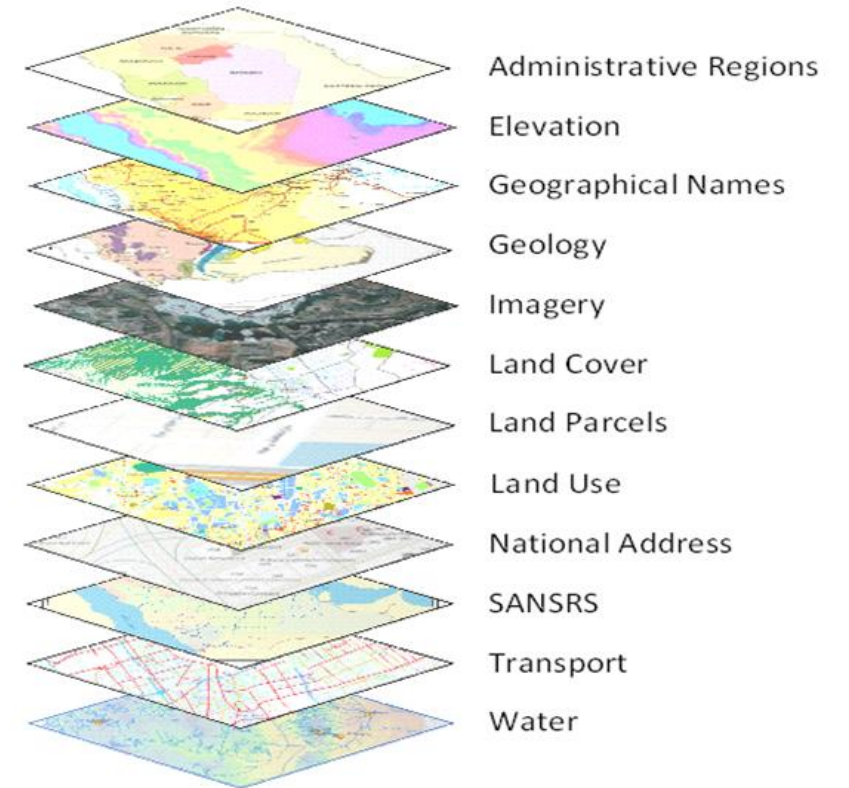

## Geospatial Data Governance Model

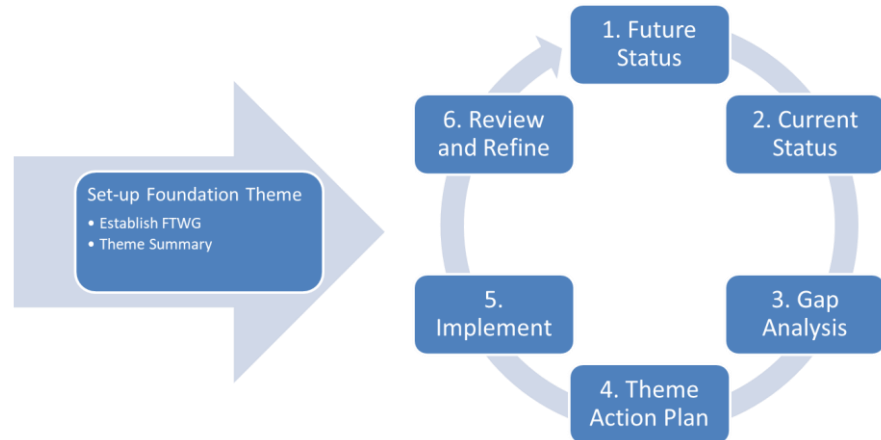

12

## Foundation Geospatial Data Themes

## Methodology Used

# Geospatial Data Standards in KSA - a glance

Geospatial Standards Guide document

National Technical Community for GS  
Adaption

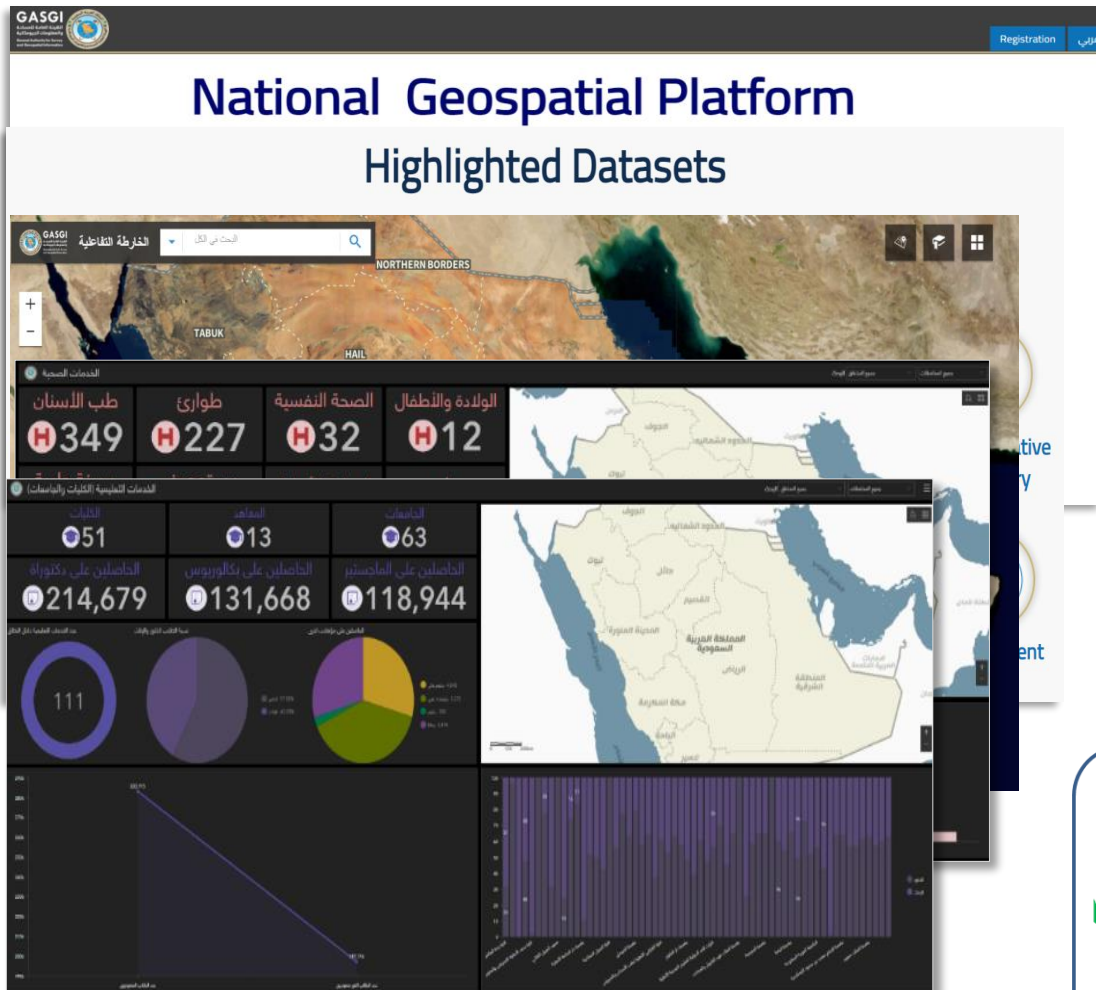

9 international organizations issuing  
geospatial standards nominated for adaption

90+ International Geospatial Standards  
Abated as National Geospatial Standard

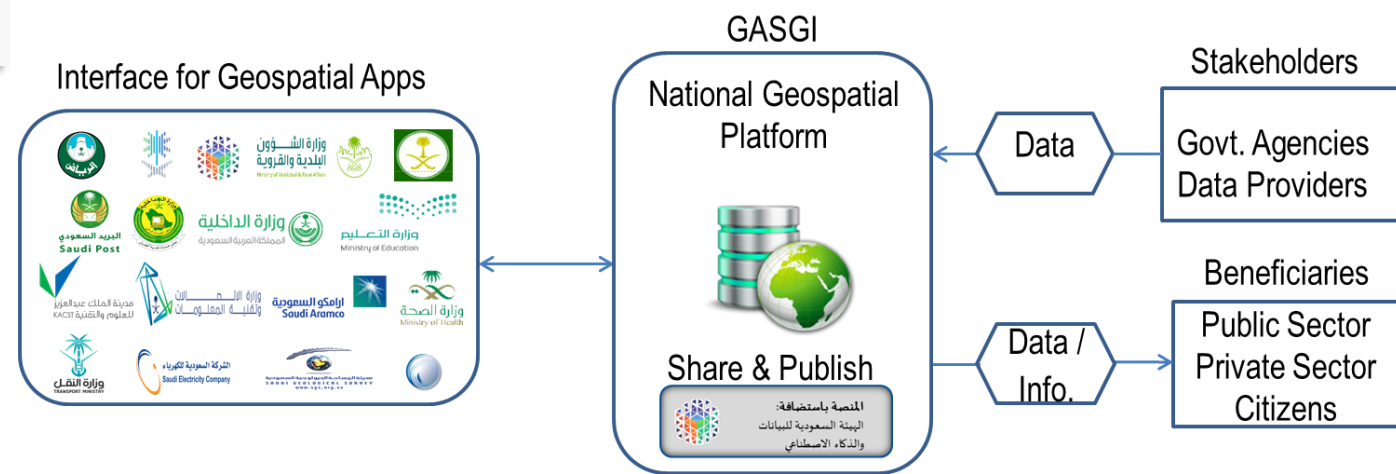

# National Geospatial Platform - a glance

National Geospatial Platform is operational since February 2020

## Publishing data on National Geospatial Platform

- Receive and publish spatial data and services on the national geospatial platform produced by the data producers.

# What Next...

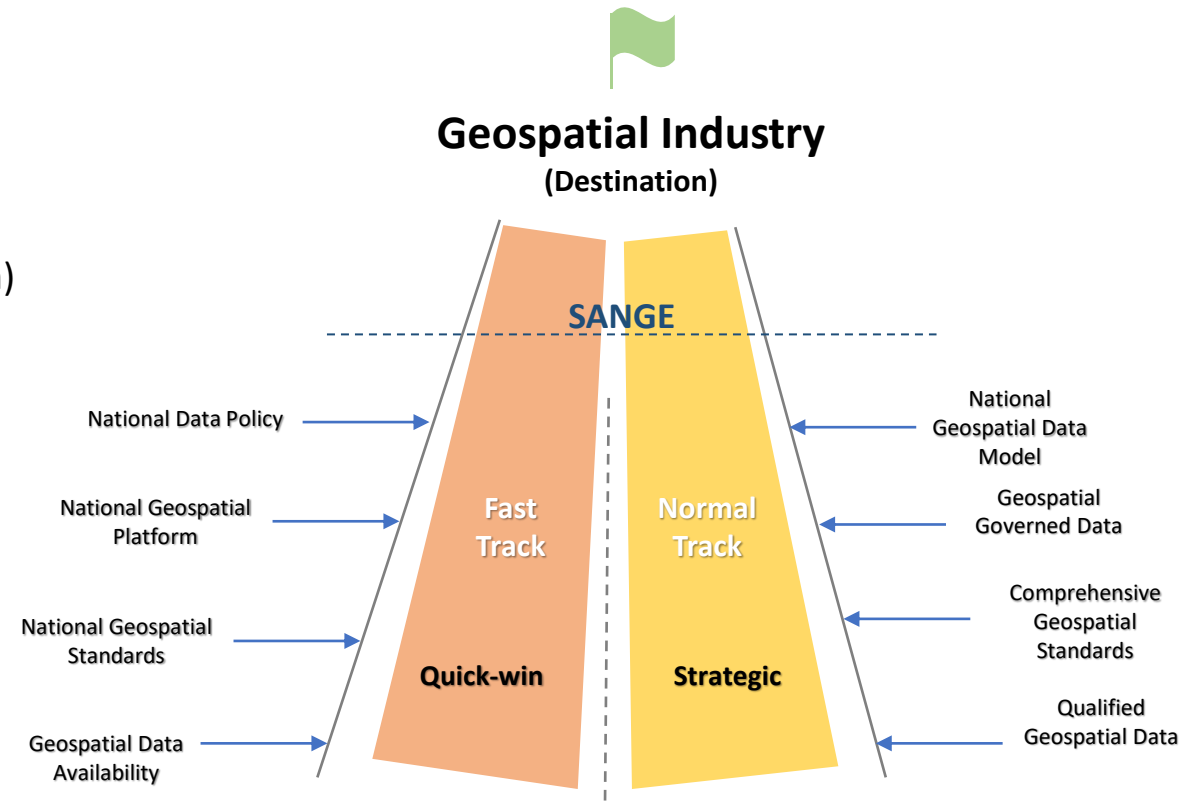

- Journey of building Geospatial Industry is along one

- **Sustainable path (strategic direction):**  
Continue Development

- SANGE (Saudi Arabian National Geospatial Ecosystem)
- GASGI Academy
- Review & improve government legislation

- **Quick-win path :**

- Provide the available data to users
- Open certain data to the public ,private and geospatial community
- Governance fundamental data sets
- Keep Enhancing data quality
- Building national data model
- Build KSA national geospatial standards

Thank you
