# WHERE ARE ALL THE POLICY MAKERS?

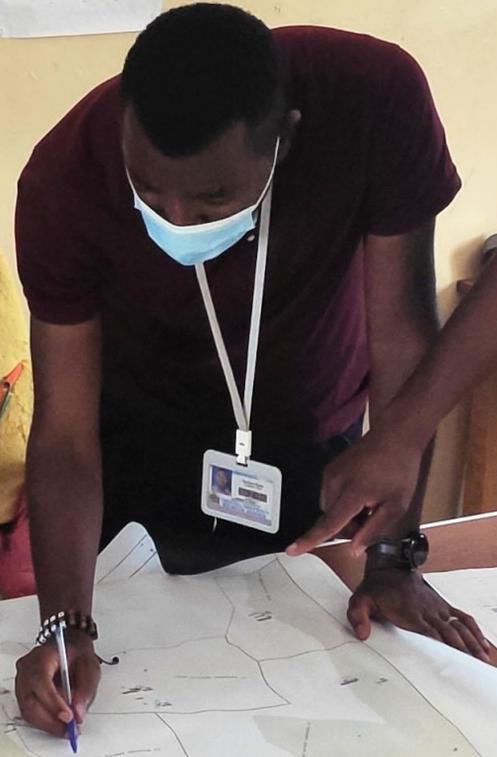

Moving from data production to data use

UN World Geospatial Information Congress  
October 2022

*“We are not going to achieve the [Sustainable Development] Goals by the next decade. We are all lagging far behind”.*

- Hans Hoogeveen (Netherlands Permanent Representative to UNFAO)

**KEY**  
▲ RHC/MP Operating  
□ BHO SITE  
■ Main Road  
✕ Dog bite  
✕ Snake bite  
✕ Chicken pox  
✕ Suspected dengue  
✕ Suspected malaria  
✕ Suspected measles  
⊙ Bho centre.

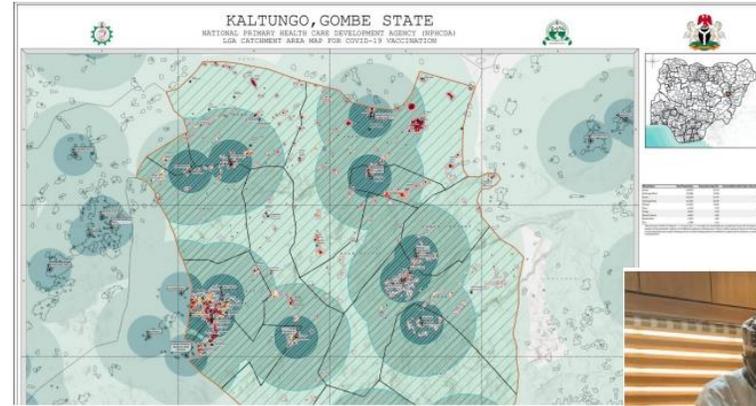

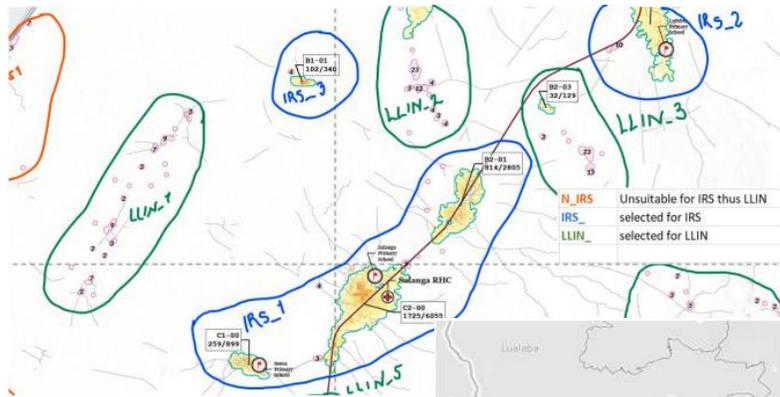

Background wall covered with various documents and charts:

- Top center: "SURVEILLANCE BASED INDICATORS"
- Top left: "DELIVERABLES TO NMEP FOR 2020"
- Top right: "SETTING THE TONE FOR 2020"
- Middle left: "KEY PERFORMANCE INDICATORS AND TARGETS JANUARY 2020"
- Middle right: "MONITORING WITHIN 6 DAYS"
- Bottom right: "NUMBER TAD CAMP"

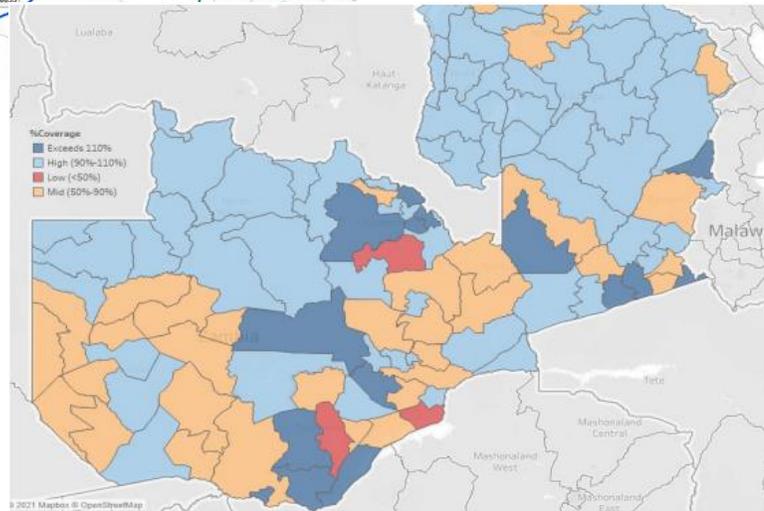

Computer monitor on the right shows a software interface with a menu bar (File, Insert, Design, Layout, Ref) and various tool icons.

# Working with policy makers on the design of interventions

COVID-19 vaccination campaign in Nigeria needed data on settlements and population broken down by age and sex

Malaria campaigns in Zambia needed 100% vector control coverage to ensure efficient resource allocation and that no settlements are missed

# Improving access to education in Sierra Leone

GRID3 worked with Ministry of Basic and Senior Secondary Education (MBSSE) on school population coverage analysis.

This analysis informed the 2021 School Infrastructure and Catchment Area Planning Policy.

GRID3 are also supporting MBSSE with policy guidelines on staffing allocations and placement optimisation of new classrooms and schools.

**How many settlements are more than an hour from the nearest school?**

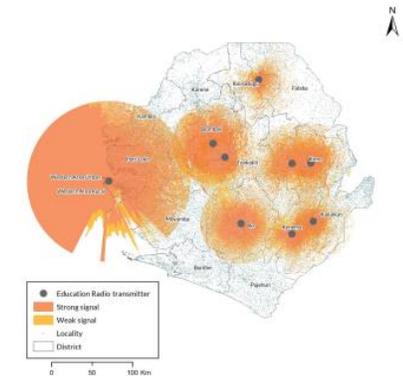

Primary school

Junior Secondary School

Senior Secondary School

Bonthé has the highest share of 12-14 year olds over an hour away from the nearest JSS

Readiness for Radio Teaching Program

# Data graveyards – where data goes to die!

If we want to get data used effectively we have to break it out of siloes.

Effective data use requires human interoperability – Individuals, not platforms are at the heart of data sharing and use.

Breakdowns in communication and coordination leave data untapped to address public challenges.

Ability to join data without losing meaning or context are crucial factors in enabling data use that empowers people and leads to better policy

*“you cannot have trust in the usability of statistics if the data that underpin them are of poor quality and those producing them lack integrity.”*

- Global Partnership for Sustainable Development Data – Data Values Project

# Better use of data comes from trust

For decision makers to use data, they must trust in its validity and reliability.

Trustworthy data practices start with establishing participatory governance holding decision makers accountable for effective data use

Misuse and ignorance of data leads to bad policy outcomes and results in declining levels of trust in public authorities.

## Contact-tracing app for England and Wales 'hampered by loss of public trust'

Summer of UK government scandals will reduce take-up of Covid-19 app, says expert

- [Coronavirus - latest updates](#)
- [See all our coronavirus coverage](#)

# We need to build stronger advocacy for data use

Discourse on improving use of data has grown – more work necessary to reach policy-makers and create data use across Governments.

Political will recognised as binding constraint on the ability of data producers to reform governance mechanisms

Data requirements and funding should be explicitly included in planning for all government programs

Virtuous cycle (data production responding dynamically to data use) – joint effort needed to grow evidence base

# Example – No 10 Data Masterclass for Senior Civil Servants

Data Masterclass equips UK public sector leaders with skills to create and support a data culture in their organisation.

## Data Driven Policy Making

- why data matters in government
- what happens when we get it wrong.
- why approach to any problem needs to start with data
- Evaluating policy interventions by testing different solutions.
- practical considerations of data projects

## Communication

- why appropriate use of data in communications is critical
- how to understand numbers behind headlines
- using data for storytelling and importance of data visualization.
- Explanation of dashboards
- tips for how to communicate data in the public sector

## Data Science

- harnessing the power of data science techniques
- how you can spot good opportunities to apply data science techniques to solve real challenges
- how to be an effective leader when it comes to fostering data science projects

# SO WHAT CAN WE DO TO ENGAGE POLICY MAKERS?

Practical actions for better engagement

# Call to action – engaging with policy makers

**Legislation** – policies, strategies and legislation must ensure appropriate infrastructure is in place to maximise data use

**Engagement** – Relationships with policy makers must be established and nurtured.

**Communication strategies** – targeted, user-oriented communication can be an effective enabler of greater data use.

**Capability** – New skills and competencies are needed among data organisations for improved data dissemination

**Better data use requires fostering a data-driven culture across the whole of government.**

# Integrated Geospatial Information Framework

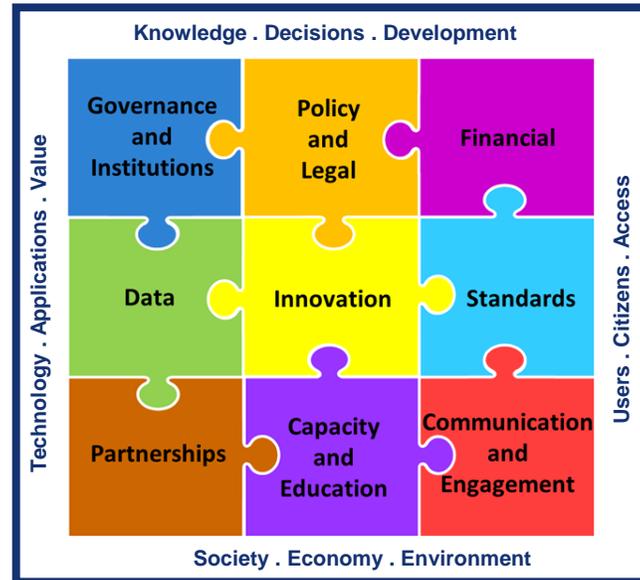

Governance

Technology

People

## Outcomes

- Elevated Trust, Confidence and Increased Use of Geospatial Information

## Tools

- Identifying Stakeholders
- Stakeholder Analysis and Comms
- Stakeholder Comms Plan
- Comms Methods

## Interrelated Actions

- Benefits Realisation Plan
- Socio-Economic Impact Assessment

## Elements

## Guiding Principles

- Trusted and Transparent

## Actions

- Providing Leadership
- Understanding Opportunities
- Communicating Value

# Summary

Data has the power to be truly transformative.....but not by us

We need to break data out of siloes and put it in the hands of decision-makers

This means advocating the value of data to policy makers and building trust

We do this by building the environment for data use – legislation, engagement and communication

Build policy engagement into country level action plans as part of the delivery of IGIF Pathway 9
