

Geospatial Capacity Development Conference on GNSS applications and DRR

17-20 January 2022

Virtual meeting

UN-GGIM
UNITED NATIONS
COMMITTEE OF EXPERTS ON
GLOBAL GEOSPATIAL
INFORMATION MANAGEMENT

SUSTAINABLE DEVELOPMENT GOALS

We support Sustainable Development Goals.

Background and Objectives:

Strengthening geospatial capacity development is one of the key issues for the United Nations Committee of Expert on Global Geospatial Information Management (UN-GGIM). Geospatial Information Authority of Japan (GSI) cordially invites you to a conference on geospatial capacity development in the areas of GNSS CORS application and Disaster Risk Reduction (DRR) for sharing key issues, challenges, best practices and expertise internationally, especially for the Asia-Pacific region among others.

Target Audience:

National Geospatial Information Authorities personnel with an interest in Capacity Development on GNSS applications and DRR, UN-GGIM and UN-GGIM-AP stakeholders, and Academic and Private Sector

Provisional Agenda: *Time is Japan time (UTC+9).

17 January	
15:30-17:30	Opening Session Welcome Address Keynote Lecture on the utilization of CORS for disaster risk reduction,
18 January	
13:00-15:00	Workshop on Geospatial DRR for Decade of Action (Day 1) <i>Contribution to Decade of Action of SDGs by sharing knowledge and initiatives from various standpoints concerning the contribution to disaster risk reduction through geodesy and geospatial information.</i> Utilization of geospatial information and geodesy for disaster risk reduction
15:30-17:30	Workshop on Operation, Maintenance and Applications of CORS (Day 1) <i>Contribution to capacity development by sharing issues faced by each country regarding the operation and maintenance, and various use of CORS, as well as by sharing Japan's knowledge and efforts to help to solve these issues.</i> Sharing situations, challenges and expertise of O&M of CORS among countries
19 January	
13:00-15:00	Workshop on Geospatial DRR for Decade of Action (Day 2) Case-based information sharing session for practical United Nations geospatial cooperation to support emergency response and disaster risk reduction efforts in and with UN-GGIM WG Disasters Task Group B.
15:30-17:30	Workshop on Operation, Maintenance and Applications of CORS (Day 2) On-going and future projects on development and application of National Network of CORS
20 January	
15:30-17:30	Workshop on Operation, Maintenance and Applications of CORS (Day 3) and Closing CORS utilization for DRR and other emerging fields by private companies

Organizers:

Geospatial Information Authority of Japan (GSI) / UN-GGIM Working Group on Geospatial Information and Services for Disasters / UN-GGIM-AP
