## Organisation of the Expert Group Meeting

- It is important that the Expert Group Meeting is positioned as a Workshop
- It is important to draw on the knowledge of all experts available, not just the “international consultant” (who doesn’t know everything)
- Local knowledge, especially from developing nations and Agencies, is key

## Desired Outcomes

- a clear understanding by members of the WG of the context in which the WGGI works, the WGGI mandates, reporting mechanisms, updates on the process and journey to date;
- a clear understanding by members of the WG of the data ecosystem, the indicators, metadata, methods, comparability, alternative data sources, challenges and realities, etc;
- a definition of quality criteria for the work of the WGGI
- a set of criteria for including indicators in the work plan of the WGGI
- a methodology for the analysis of indicators and metadata through a geographic lens
- initial analysis of several indicators through a geographic lens
- **Committed Work Plan for the WGGI for 2017 and beyond**
