

## What is the purpose of the Guidelines?

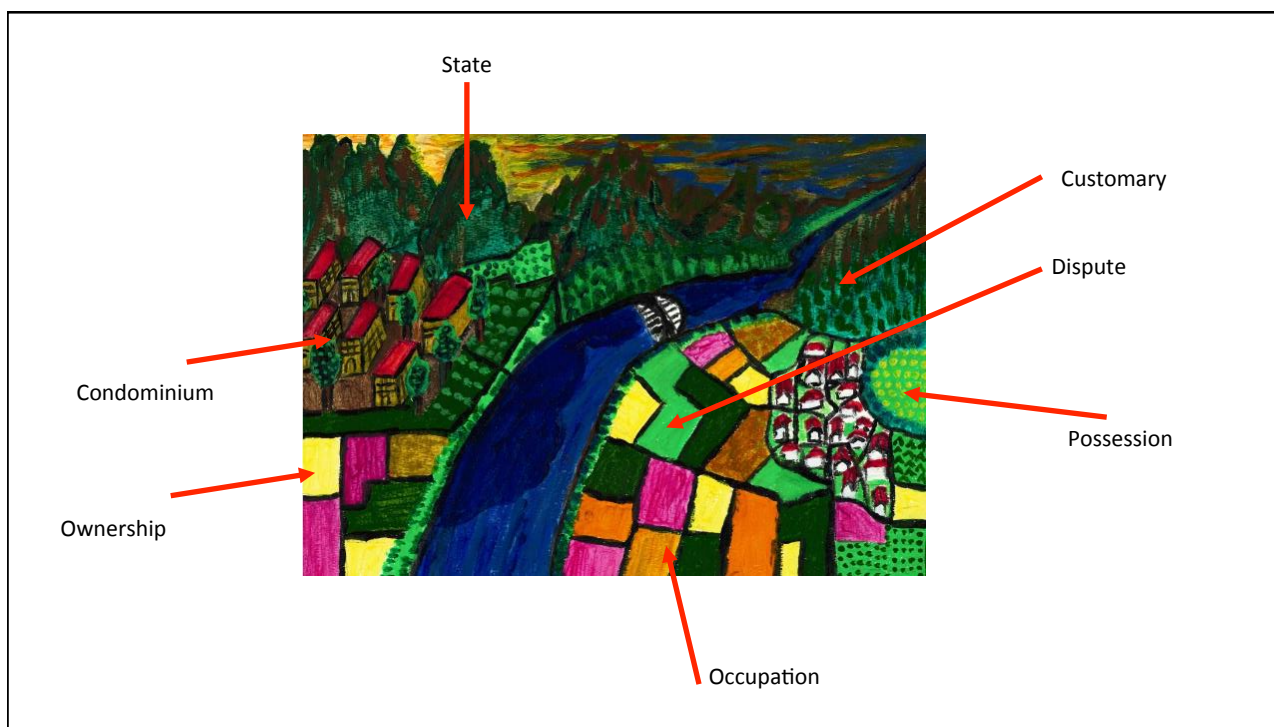

- The Guidelines promote responsible governance of tenure of land, fisheries and forests, with respect to **all forms of tenure**: public, private, communal, indigenous, customary, and informal.

## What is the purpose of the Guidelines?

- Their overarching goals are to **achieve food security for all** and support the progressive realization of the right to adequate food in the context of national food security. While supporting efforts towards the eradication of hunger and poverty, the Guidelines are also intended to contribute to **achieving sustainable livelihoods, social stability, housing security, rural development, environmental protection, and sustainable social and economic development**. The Guidelines are meant to benefit **all people in all countries**, although there is an emphasis on vulnerable and marginalized people.

## What is the purpose of the Guidelines?

- The Guidelines serve as a reference and **set out principles and internationally accepted standards for practices for the responsible governance of tenure**. They provide a **framework** that States can use when developing their own strategies, policies, legislation, programmes and activities. They allow governments, civil society, the private sector and citizens to **judge** whether their proposed actions and the actions of others constitute acceptable practices.
