- The General Assembly has decided that the OWG's Outcome Document will be the main basis for integrating the SDGs into the future development agenda.
- 17 goals accompanied by 169 targets. Will be further elaborated through indicators focused on measurable outcomes.
- How many of these goals capture or include elements of geography, place, and location?
- As the peak global inter-governmental entity on geospatial information, how does UN-GGIM ensure geospatial information contributes more holistically to Sustainable Development?
