Meeting the geospatial infrastructure needs for national implementations of the SDGs

5th High Level Forum UN-GGIM Mexico City 28-30 nov. 17

Sergio Cimbaro

President of the National Geographic Institute of Argentina Executive Coordinator of the Spatial Data Infrastructure of the Argentine Republic (IDERA)

Argentina Republic

National Council for the Coordination of Social Policies

20 National Ministries

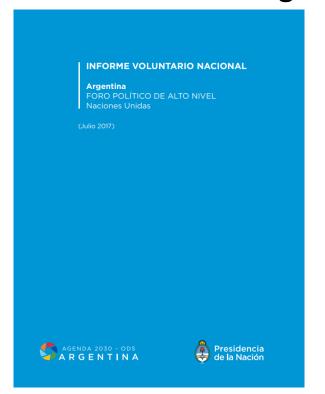

Guidance documents for the SDGs

- 1st National voluntary review.
- Provisional list of goals and indicators for monitoring the SDGs.

Links the SDGs with 8 national objectives and 100 government priorities

Objetivo	Meta	Indicador de seguimiento
8 TRABAJO DECENTE Y CRECIMIENTO ECONÓMICO	Meta 8.10. Fortalecer la capacidad de las instituciones financieras nacionales para fomentar y ampliar el acceso a los servicios bancarios, financieros y de seguros para todos.	8.10.8. Crédito al sector privado no financiero como porcentaje del Producto Interno Bruto nominal.
		8.10.9. Crédito hipotecario al sector privado no financiero como porcentaje del Producto Interno Bruto.
		8.10.10. Cantidad de tarjetahabientes (de crédito) por cada 100.000 adultos.
	Meta 8.b. De aquí a 2030, desarrollar y poner en marcha una estrategia mundial para el empleo de los jóvenes y aplicar el Pacto Mundial del Empleo de la Organización Internacional del Trabajo.	8.b.1. Gasto total de fondos públicos en programas de protección social o de empleo como porcentaje de los presupuestos nacionales.
9 INDUSTRIA, INNOVACIÓN E INFRAESTRUCTURA	Meta 9.1. Desarrollar infraestructuras fiables, sostenibles, resilientes y de calidad, incluidas infraestructuras regionales y transfronterizas, para apoyar el desarrollo económico y el bienestar humano, haciendo especial hincapié en el acceso asequible y equitativo para todos.	9.1.1. Calidad de la vialidad nacional.
		9.1.2. Rutas seguras y autopistas nacionales construidas por Vialidad Nacional.
		9.1.3. Mejoramiento de vías ferroviarias o infraestructura ferroviaria renovada.
		9.1.4. Volumen de carga transportada por modo de transporte.

Percentage of the population located less than 2 km. of roads of permanent passability.

We can generate indicators that link statistical information with geospatial information, for example:

The construction of the indicators has the support and evaluation of the National Institute of Statistics and Censuses

The work program that we develop between the INDEC and the IGN is based on the integration of statistical and geospatial information proposed by UNSD and UN-GGIM, and contemplates the joint participation in the working table of the Sustainable Development Goals.

LOS OBJETIVOS DE DESARROLLO SOSTENIBLE (ODS)

It is necessary that the Cartographic Agencies and / or the institutions responsible for the SDI of the countries link up with the national focal points in charge of implementing the SDGs

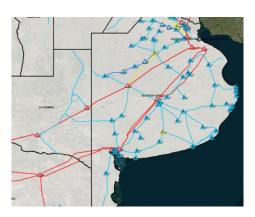

Geospatial information provided by the Geographic Institute

Integration of the layers of geospatial information that make up the Spatial Data Infrastructure

They allow to generate more realistic indicators to achieve the Sustainable Development Goals

Settlements

Agriculture

Power lines

Cultural industries

The Council works together with the provinces and municipalities to adapt the SDGs with their government objectives

Adaptation of the SDGs to the strategic lines of provincial government (Salta Province)

SISTEMAS DE INFORMACIÓN PARA LA PLANIFICACÓN

The local SDI as a component of the information systems for the follow-up of the goals of the SDGs

Conclusions

- For the strengthening of Spatial Data Infrastructures, it is necessary to guarantee a relevant role for national cartographic agencies and cadastral agencies, due to their experience and competence in the management of geospatial information.
- The integration of geospatial information with statistics generates new indicators that will allow achieving the Sustainable Development Goals in a more efficient manner.
- It is necessary to adapt the Sustainable Development Goals with the levels of government closest to the citizenship, such as the provinces or municipalities.

MUCHAS GRACIAS
