

# Global Fundamental Geospatial Data Themes

Data and information for SDGs

United Nations  
Economic Commission  
for Africa

Geoinformation &  
Spatial Statistics

Andre Nonguierma

International Workshop on Global Fundamental  
Geospatial Data Themes for Africa  
25-27 April 2018  
Addis Ababa, Ethiopia

**UN-GGIM: AFRICA**  
UNITED NATIONS INITIATIVE ON  
GLOBAL GEOSPATIAL  
INFORMATION MANAGEMENT

# The Policy Drivers : Global Need for Spatially-Enabled Complex Information

- A right decision making requires the gathering and reviewing of up-to-date, cold & hard facts.
- For the facts to be interpreted, understood, and linked to our goals and to our decisions, we need to bring together data linked with the one thing they have in common : Location (Where)

# African Data Nexus Issues

- Mapping of the African continent has been at best very patchy. The territories of many countries have not been systematically mapped, particularly in the post-colonial era, at scales that are adequate for national development purposes.
- There have been several project-specific mapping activities, but they have often been sporadic and have usually tended to meet the minimum requirement of a particular project. In addition, institutions in the North hold much of the data, with little or no access to users in Africa.

<b>Core Data :</b> Poor Mapping Coverage Lack of consistency	2.5 % of the Continent is Mapped at 1/25.000 (Europe: 86.9% ; Russia : 100%)
<b>Frameworks &amp; Tools :</b>	Poor Interoperability Lack of Standardisation Non codified rules for data access
<b>Applications:</b> Duplication of efforts	Several applications build repetitively the same datasets Data are not publicized
<b>Capacity :</b> Recognition & Retention of Professionals	Critical mass. Turnover
<b>Governance:</b> Lack of Coordination	Redundancies in initiatives. Inadequacy

- ▣ **Disponinility**  
Finding the appropriate information at the required time and at the relevant scale of aggregation
- ▣ **Accessibility**  
Even where information is available, it may not be easily accessible, either because of the lack of tehnology for effective access or because of associated costs
- ▣ **Transformability**  
There is a general lack of infrastructure capacities for the collection and assessment of water data, for their transformation into useful information and for their dissemination.

# Africa Response : The Durban Statement

- That every country identifies its fundamental data sets, from which the consistent regional fundamental data sets should be derived, including geodetic framework, topography, administrative boundaries, transportation, etc.
- That every development project proposal identifies, up front, programmatic arrangements for continuous maintenance of resulting data sets at the end of project.
- That every country develops or adopts mapping standards consistent with international standards
- That mapping activities be prioritized in line with priority needs of Africa

# Africa Initiative : Mapping Africa for Africa

- Initiative to accelerate the rate of geoinformation activities in Africa
- A plan of action to provide the fundamental geo-spatial information for sustainable development in support of regional projects
- Premised on the principle that Africa should be involved, if not lead, the production of maps of Africa
- Based on the Durban Statement
- In collaboration with the International Cartographic Association (ICA) and other global institutions
- Fundamental data sets definition document published
- Ongoing Study : Guidelines for Best practices of FDS

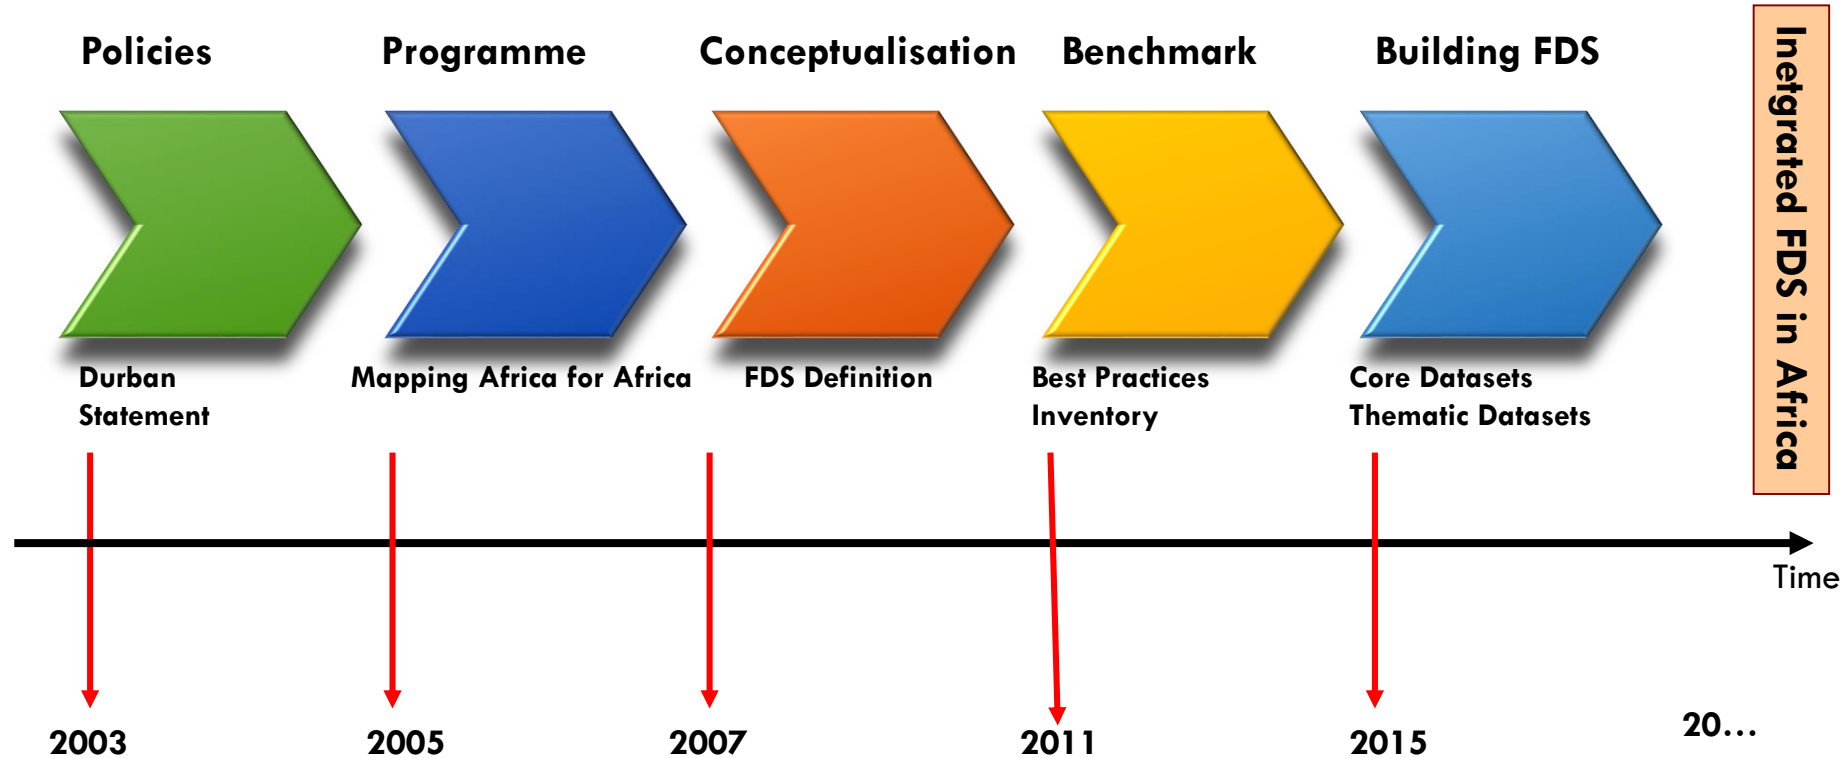

Determination  
of Fundamental  
Datasets for Africa

Geoinformation in Socio-Economic  
Development

# MAfA : Business Model

- Phased Approach

# What are Fundamental Geospatial Datasets for Africa

Data Theme	Data Set
<b>Geodetic Control Network</b>	Geodetic control points
	Height datum
	Geoid model
<b>Rectified Imagery</b>	Aerial photography
	Satellite imagery
<b>Hypsography</b>	Digital elevation model
	Spot heights
	Bathymetry
<b>Hydrography</b>	Coastline
	Natural water bodies
<b>Boundaries</b>	Governmental units
	Populated places
	Enumeration areas
<b>Geographic names</b>	Place Names
	Feature Names

Data Theme	Data Set
<b>Land management units/ areas</b>	Land Parcels/Cadastre
	Land Tenure
	Street Address
	Postal or zip code zones
<b>Transportation</b>	Land use planning zones
	Roads
	Road centrelines
	Railways
	Airports and ports
<b>Structures</b>	Bridges and tunnels
<b>Utilities and services</b>	Power
	Telecommunications
<b>Natural environment</b>	Land cover
	Soils
	Geology

# Comparison with Others

	<b>CODIST</b>	<b>INSPIRE</b>	<b>ANZLIC</b>	<b>UN-GGIM</b>
	<i>Africa</i>	<i>Europe</i>	<i>Au. &amp; NZ</i>	<i>Proposal</i>
1	Geodetic Control Network	Coordinate reference systems	Positioning	Positioning (geodetic)
2	Geographic names	Geographical names	Place names	Names (Gazetteer)
3	Boundaries	Administrative units	Administrative boundaries	Administrative Boundaries
4	Hydrography	Hydrography	Water	Water (Hydrology)
5	Land Management	Cadastral parcels	Geocoded addressing	Address (Buildings)
6	Transportation	Transport networks	Transport	Transport
7	Natural Environment	Protected sites	Land cover	Cadastre (Tenure)
8	Utilities	Addresses	Land parcels	Land Cover (Vegetation)
9	Hypsography	Geographical grid systems	Elevation & depth	Elevation
10	Imagery		Imagery	Imagery (Satellite & photo)
11				Bathymetry (Hydro)

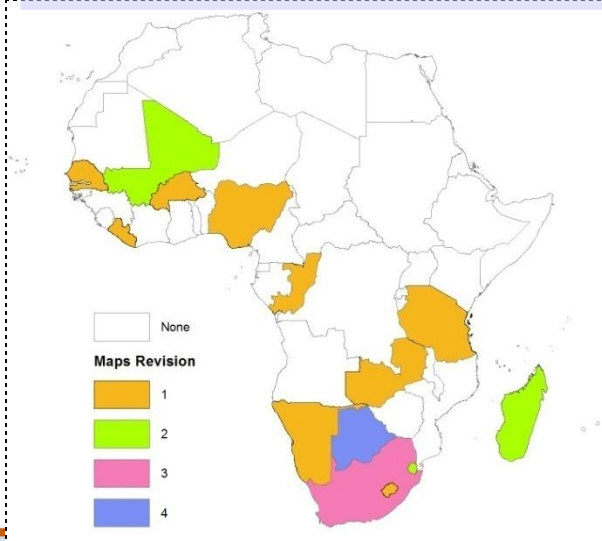

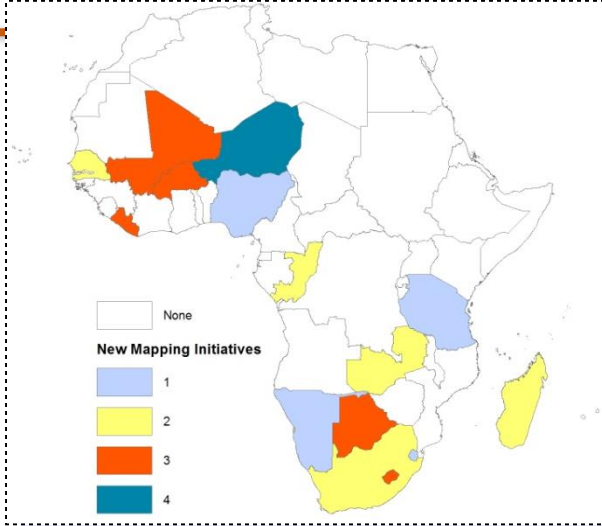

# Africa Efforts : Policies – People - Data

- Policies : (NSDI)
  - Cooperative, multi-stakeholder approach to production, management, and dissemination of spatially enabled data.
- Data : Purpose-oriented datasets
  - Structured and comprehensive data foundation that would be consistent, comparable and compatible at all levels.
- Technicalities
  - Robust geodetic infrastructure
  - Standards to ensure compatibility and interoperability

# FDS Status In Africa : Mapping Activities

<p><b>Country with New Mapping Initiatives</b></p>	<p>Botswana, Burkina, Congo, Lesotho, Liberia, Madagascar, Mali, Namibia, Niger, Nigeria, Senegal, South Africa, Sudan, Swaziland, Tanzania, Zambia</p>
<p>Countries with Maps Revision</p>	<p>Botswana, Burkina, Congo, Lesotho, Liberia, Madagascar, Mali, Namibia, Nigeria, Senegal, South Africa, Sudan, Swaziland, Tanzania, Zambia</p>

# FGDT for Africa Business Focus

- **Data Centric activities**
  - Developing a taxonomy of data sets and Semantic of FDS
  - Linking Geography and Statistics
  - Fundamental geospatial datasets
- **One Source Spatial Data Warehouse**
  - Identify existing data and information resources and create a metadata clearinghouse to enable the discovery of these data
  - Upgrade the data and information resources to make their products accessible to the wider user community (online, interoperable, open access)
- **One Source Visualization Facility**
  - Implement a geospatial portal to integrate all datasets into a Common Platform (ARSDI)

# Thank You....

UNITED NATIONS INITIATIVE ON  
GLOBAL GEOSPATIAL  
INFORMATION MANAGEMENT

www.uneeca.org

The screenshot shows the homepage of the United Nations Economic Commission for Africa (UNECA). At the top, there is a navigation bar with the UNECA logo and the text "United Nations Economic Commission for Africa". To the right, there are language options for "English" and "Français", and a search bar. Below the navigation bar, there are several main sections:

- Investing in people-centered innovation and technology essential to Africa's development**: A featured article with a "READ MORE" button and navigation arrows for "PREVIOUS" and "NEXT".
- MAJOR EVENTS**: A list of upcoming events, including the "AFRICAN ECONOMIC CONFERENCE 2014" (01-03 November 2014, Addis Ababa, Ethiopia) and the "CONFERENCE ON LAND POLICY IN AFRICA" (11-14 November 2014, Addis Ababa, Ethiopia).
- RECENT STORIES**: A list of recent news items, such as "06 NOVEMBER 2014 As elections become more regular in Africa, so has intolerance of diversity" and "05 NOVEMBER 2014 Irish President Michael D. Higgins calls for African-driven alternative development models".
- AFRICA CHEETAH RUN**: A blog post titled "THE EXECUTIVE SECRETARY'S BLOG" dated "POSTED ON: 16 OCTOBER 2014" with the subtitle "Innovative Financing a Must for Africa".
- MAIN AREAS OF WORK**: A grid of six icons representing different work areas: Macroeconomic Policy, Social Development, Regional Integration and Trade, Natural Resource Management, Innovation & Technology, and Gender.
- AFRICAN POLICY CENTRES**: A grid of six policy centres, including the African Centre for Statistics, African Minerals Development Centre, African Institute for Economic Development and Planning (IDEP), African Climate Policy Centre, Land Policy Initiative, and African Trade Policy Centre.
- ECA DATABANK**: A section with a quote: "What proportion of the total population in Africa use an improved drinking water source?" and a button to "Discover more on the ECA DATABANK".
