

UNITED NATIONS WORLD GEOSPATIAL INFORMATION CONGRESS

Deqing, Zhejiang Province, China
19-21 November 2018

UN-GGIM

Working group on Legal and Policy
Frameworks for Geospatial Information
Management

Agenda item #3

Swedish National perspective on
legal and policy frameworks for
geospatial information management

Mr. Tomas Öhrn
Chief Legal Adviser

LANTMÄTERIET

*The Swedish Mapping, Cadastre and Land Registration
Authority*

Target structure

Parliament-related goals

An innovative and co-operative public administration that is fair, legal and efficient, has well-developed quality, service and accessibility, thereby contributing to Sweden's development and effective EU work

Sweden will be the best country in the world to make use of the potential of digitization

Government goals

A more simple life for all citizens

A more open public administration that supports innovation and participation

Better quality and efficiency in the public administration

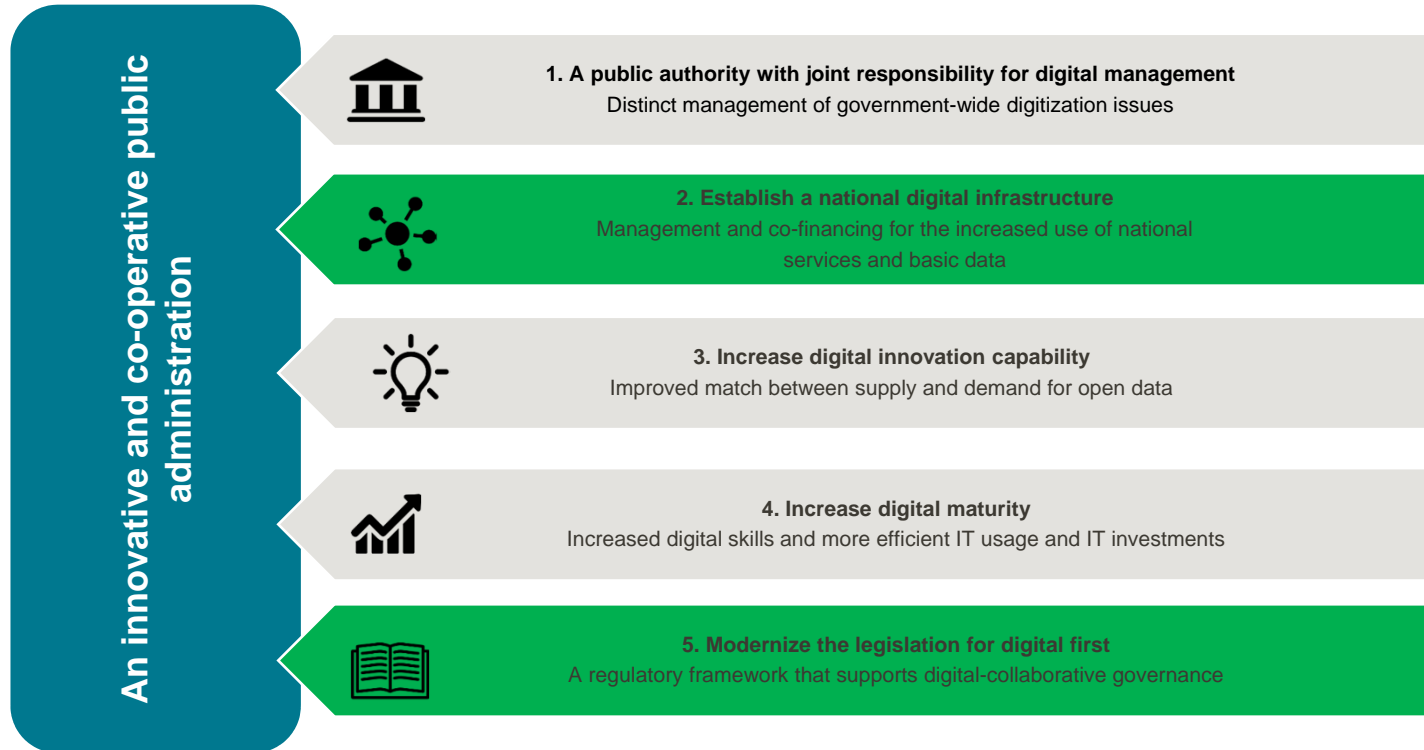

Government alignment

Digital handling should be first choice in the public administration and in contact with private individuals and companies

Digital first: 5 priority action areas

Four designated areas

- Development-authorities that accelerate digitization in four different sectors of society
 - **A smarter food chain:** (Livsmedelsverket and Jordbruksverket)
 - **A smarter community building process:** (Lantmäteriet and Boverket)
 - **Smarter environmental information:** (Naturvårdsverket)
 - **Simplified entrepreneurship in the restaurant and tourism sector:** (Different authoritys)
- Government assignments

Finansdepartementet

Foto: Maskot / Folio

Need for more distinct responsibility and increased standardization

Government assignments

- Safe and efficient access to basic data
- Safe and efficient electronic information exchange in the public sector
