

Operational Framework for Integrated Marine Geospatial Information Management (IGIF-H)

Working Group on Marine
Geospatial Information

United Nations Committee of Experts on Global Geospatial Information Management

UN-GGIM Bureau:

Co-Chairs: Belgium, Mexico, Kingdom of Tonga

Rapporteur: Morocco

UN-GGIM Regional Committees & Chairs:

- Africa: Senegal
- Americas: Chile (*incoming*)
- Arab States: Saudi Arabia
- Asia-Pacific: Australia
- Europe: Slovenia

UN-GGIM Thematic Networks:

- Academic Network
- Private Sector Network
- Geospatial Societies
- United Nations Geospatial Network

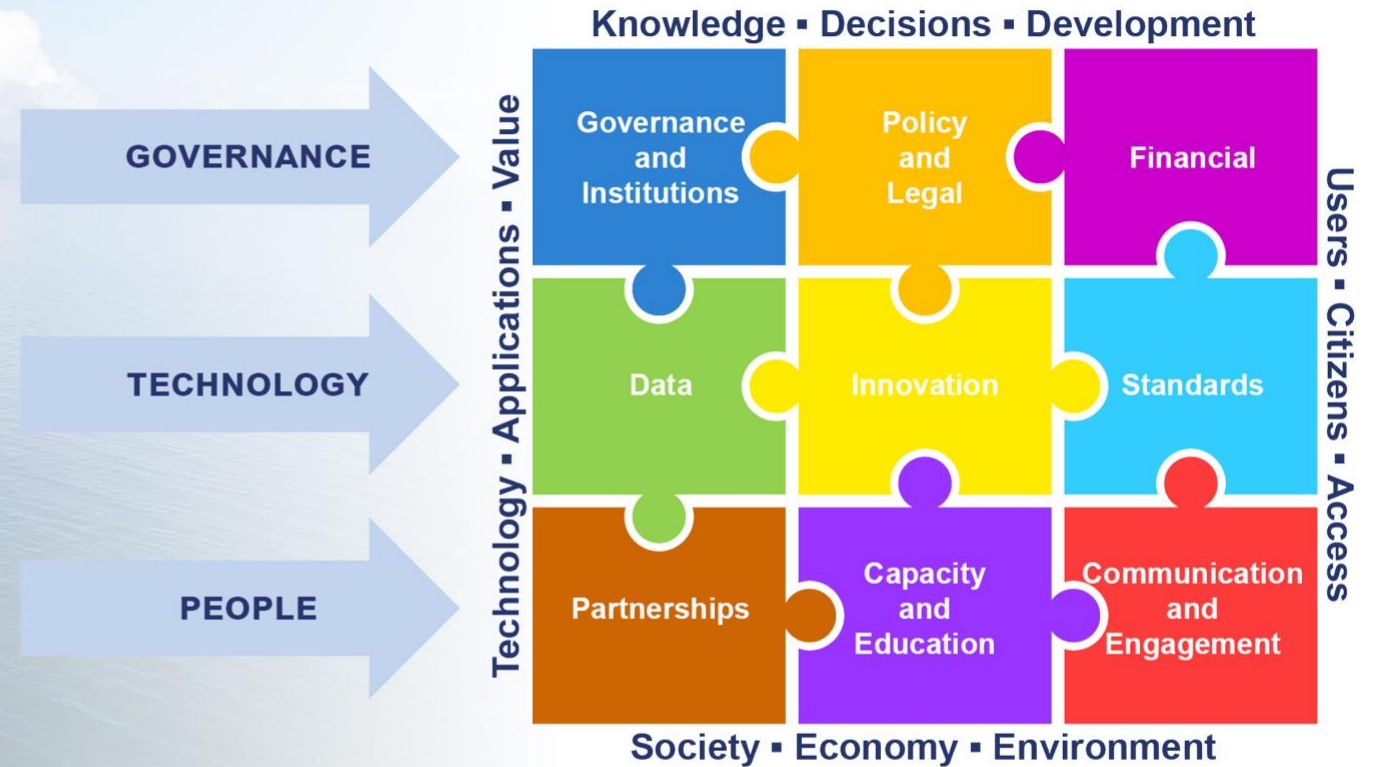

International Standards Development Organizations

The Committee of Experts, a subsidiary expert body of the Economic and Social Council of the United Nations, is the peak intergovernmental body to liaise and coordinate among Member States, and between Member States, international organizations and stakeholders, to foster better coordination and coherence in geospatial information management

The Integrated Geospatial Framework provides a basis and guide for developing, integrating, and strengthening geospatial information management.

Anchored by nine Strategic Pathways, the Framework is a mechanism for articulating and demonstrating national leadership in geospatial information, and the capacity to take positive steps.

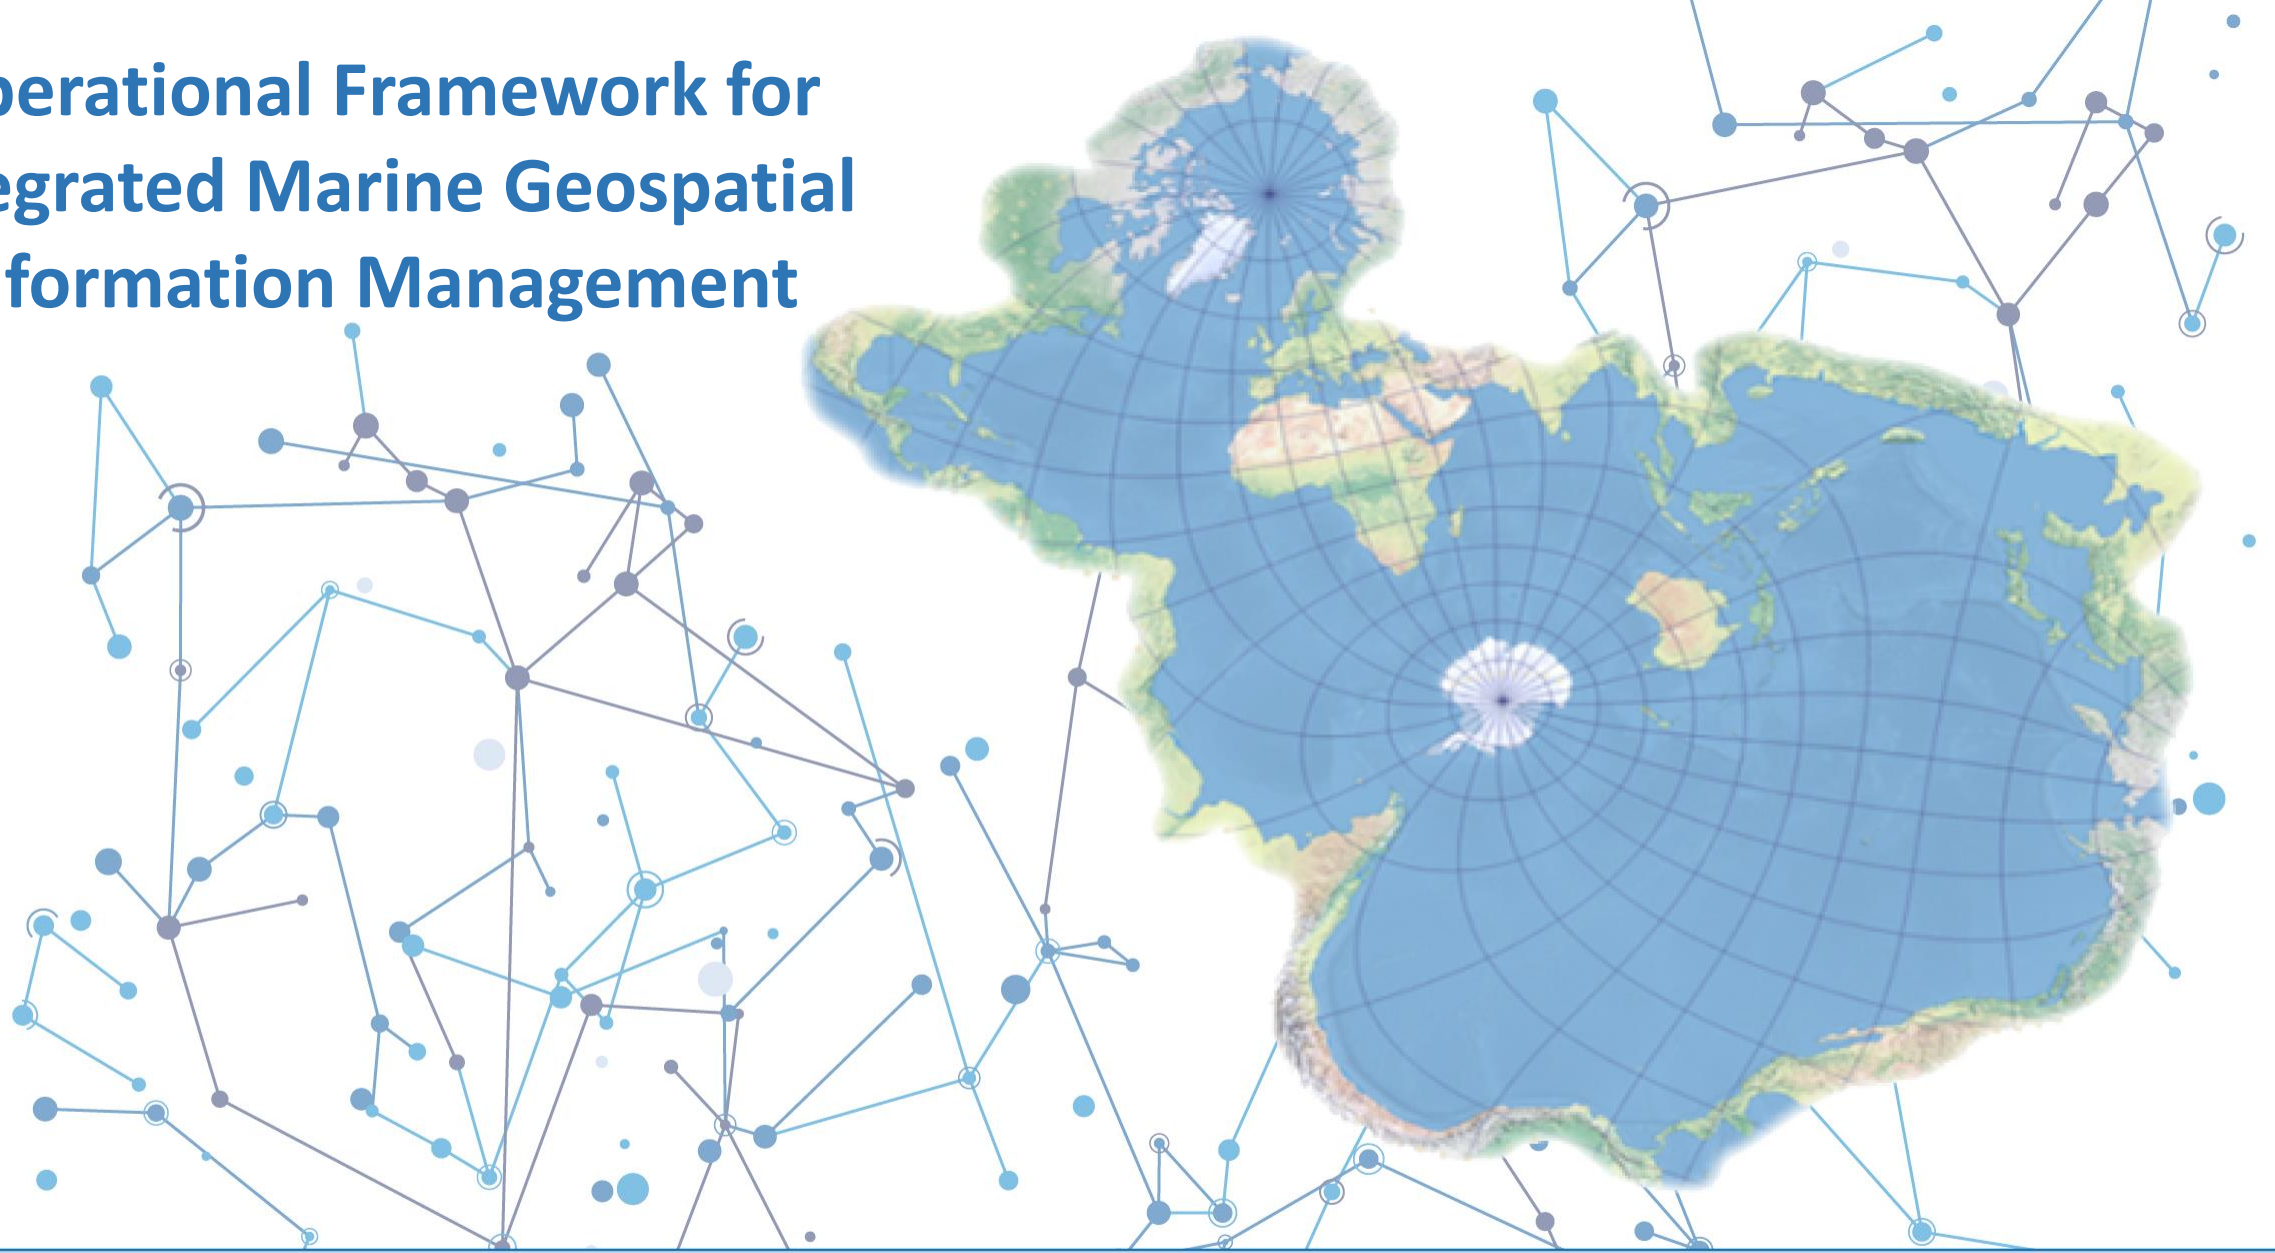

**Anchored by nine Strategic Pathways,
the Integrated Geospatial Information Framework
is a mechanism for articulating and demonstrating
national leadership in geospatial information, and
the capacity to take positive steps.**

SUSTAINABLE DEVELOPMENT GOALS

Operational Framework for Integrated Marine Geospatial Information Management

Operational Framework for Integrated Marine Geospatial Information Management

(Integrated Geospatial Information Framework – Hydro “IGIF-H”) High Level

Two part document

Part One – background, challenges and value proposition

Part Two – broken down by IGIF Strategic pathways for the water domain

Scope – Oceans, Seas, rivers, waterways/watercourses, lakes, inland waters, wetlands, glaciers...

Part 1

- Overview
- Introduction and Background
- The Main Challenges
- A Value Proposition for the Marine Domain

Part 2

- Introduction
- Governance and Institution
- Legal and Policy
- Data
- Standards
- Partnerships
- Capacity and Education
- Communication and Engagement

An underwater photograph of a coral reef. In the foreground, there are various types of coral, including a large, reddish-brown brain coral on the right and some orange and white branching corals at the bottom. Two large, greyish-brown fish with prominent blue eyes are swimming towards the left. The background is filled with many small, silvery fish swimming in the clear, turquoise water.

Thank You
