“.. access to high quality, timely, reliable and disaggregated data. .. exploit the contribution to be made by a wide range of data, including Earth observations and geospatial information, while ensuring national ownership in supporting and tracking progress”

Paragraph 76,
Transforming our World:
The 2030 Agenda
for Sustainable Development
(A/RES/70/1)

“Solid science, reliable data, and analysis are critical for policy- and decision-making, especially for the tough choices required during a pandemic.”

National Priorities, Crises and 2030 Agenda for Sustainable Development

The IGIF is a multi-dimensional Framework that is aimed at strengthening national geospatial information management in countries, developing countries in particular. It comprises an overarching Strategy – from local to global, Implementation guidance, and Action plans at the country level.

With a focus on the ability for geospatial information to be integrated with any other meaningful data to solve societal and environmental problems, the IGIF acts as a catalyst for economic growth and opportunity and stimulates improved understanding and decision-making for national development priorities and the SDGs.

Governance →

Technology →

People →

Anchored by nine Strategic Pathways, the Framework is a mechanism for articulating and demonstrating national leadership in geospatial information, and the capacity to take positive steps.

<http://ggim.un.org/IGIF/>

Advance National Development Priorities

Advance the 2030 Agenda for Sustainable Development

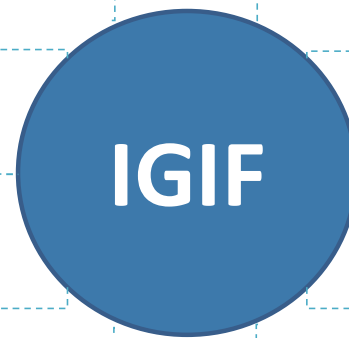

Modernize National Geospatial Capacities

Advance Geospatial in Broader Digital Information Ecosystem

Support SDGs Global Indicator Framework and the Integration of Statistical and Geospatial Information (GSGF)

Support Effective Land Administration (FELA)

Improve Health Care Delivery and Response

Manage Impacts of Climate Change

Facilitate Disaster Risk Reduction and Management

Basis for integrating the terrestrial, maritime and cadastral domains (e.g., IGIF-H)

What can we do for ECOSOC?

- Strengthen the alignment of our work with the ECOSOC agenda
- Contribute to Climate Change Challenge
- Contribute to Gender Equality in our community
- Focus on all SDG
- Foresee ECOSOC priorities explicitly in our agenda
- Encourage Member State engagement
- Participate in/ Organize a side event at ECOSOC meeting
- Provide integrated policies
- Broaden stakeholder participation

What can ECOSOC do for us?

- Be a matchmaker to encourage cooperation between subsidiary bodies
- Be an amplifier to promote the implementation of our work such as the IGIF
- Invite us to an event at ECOSOC segment or meeting
- Invite us to a cross-sectorial meeting on a specific theme in 2023
- Provide us a sustainable future to maintain momentum and impacts

SUSTAINABLE DEVELOPMENT GOALS

The transformative nature of the 2030 Agenda requires new and innovative data sources and integration approaches to implement the SDGs and to ‘leave no one behind’.

The SDGs are highly dependent on geospatial information and enabling technologies as the primary data and tools for relating people to their location, place and environment, and to measure ‘where’ progress is, or is not, being made, especially at local levels.

National Priorities and 2030 Agenda for Sustainable Development

STRATEGIC DRIVERS

National Development Agenda • National Strategic Priorities • National Transformation Programme • Community Expectations • Multilateral trade agreements • Transforming our World: 2030 Agenda for Sustainable Development • New Urban Agenda • Sendai Framework on Disaster Risk Reduction 2015 – 2030 • Addis Ababa Action Agenda • Small Island Developing States Accelerated Modalities of Action (SAMOA Pathway) • United Nations Framework Convention on Climate Change (Paris Agreement) • United Nations Ocean Conference: Call for Action

Integrated Geospatial Information Framework (IGIF)

Strategic Framework on Geospatial Information and Services for Disasters

Global Statistical Geospatial Framework (GSGF)

Framework for Effective Land Administration (FELA)

Global Fundamental Geospatial Data Themes

Global Geodetic Reference Frame (GGRF)

National Institutional Arrangements in Geospatial Information Management

Role of Standards in Geospatial Information Management

Compendium on Licensing of Geospatial Information

Future Trends in Geospatial Information Management Reports

Implementing national programmes and priorities and the 2030 Agenda for Sustainable Development will be sub-optimal without globally developed, consulted and adopted frameworks, strategies and mechanisms to integrate data and information for the measuring, monitoring and reporting processes.

“the availability of high-quality data is also critical, helping decision makers to understand *where* investments can have the greatest impact”
