

**UN-GGIM:Americas**

REGIONAL COMMITTEE OF UNITED NATIONS  
ON GLOBAL GEOSPATIAL INFORMATION  
MANAGEMENT FOR THE AMERICAS

# 9° SESSION

## UN-GGIM: Americas

### Working Group on the integration of statistical and geospatial information (GT-IIEG)

REPORT  
Gabriela Garcia Seco

November 28, 29 and 30  
Santiago de Chile, ECLAC

# MEGA version 1.0

## Geoviewer for downloading information

### ● Países con información ● Countries with information

-  Antigua y Barbuda
-  Argentina
-  Bahamas
-  Barbados
-  Bolivia
-  Brasil
-  Canadá
-  Chile
-  Colombia
-  Costa Rica
-  Cuba
-  Dominica
-  Ecuador
-  El Salvador
-  United States of America
-  Granada
-  Guatemala
-  Guyana
-  Honduras
-  Jamaica
-  México
-  Nicaragua
-  Panamá
-  Paraguay
-  Perú
-  República Dominicana
-  St. Maarten
-  St. Vincent and the Grenadines
-  Suriname
-  Trinidad & Tobago
-  Uruguay
-  Venezuela

# Implementation of the MEGA version 2.0

## Countries that submitted information:

---

- Chile
- Colombia
- Costa Rica
- Ecuador
- El Salvador
- United States
- Guatemala
- Mexico
- Panama
- Dominican Republic

- 
- Outdated list of focal points.
  - Complexity of the collection instruments.
  - Lack of standardization of thematic concepts.
  - Lack of interoperability in information management.

# Work Plan 2022 – 2025

## Working Group on the integration of statistical and geospatial information (GT-IIEG)

**Objective 1.** Promote and strengthen GSGF principles in the geostatistical community.  
Strengthen capacities

- Regional seminar on the GSGF and its five principles
- Workshops on each of the principles

**Objective 2.** Strengthening the Statistical and Geospatial Framework of the Americas

**Specific Objective.** Define the geostatistical levels to be included in the MEGA.

## Next steps 2022 – 2025

---

1. MEGA as a SINGLE Geostatistical Framework for the Americas to support compliance with the principles of integration of statistical and geospatial information (GSGF).
  2. Integration of the MEGA platform into the SDI of the Americas.
  3. MEGA as a support framework for integrating and disseminating geostatistical information through CEPALSTAT.
  4. Interoperability with other regional platforms
  5. Use the standard geocode generated by MEGA to integrate statistical and geospatial information.
  6. Promote the disaggregation and implementation of common geographies in the Americas.
