Making data easy to access and use

Meeting the needs of diverse users

Agency
Production
Systems

Digital Atlas for government

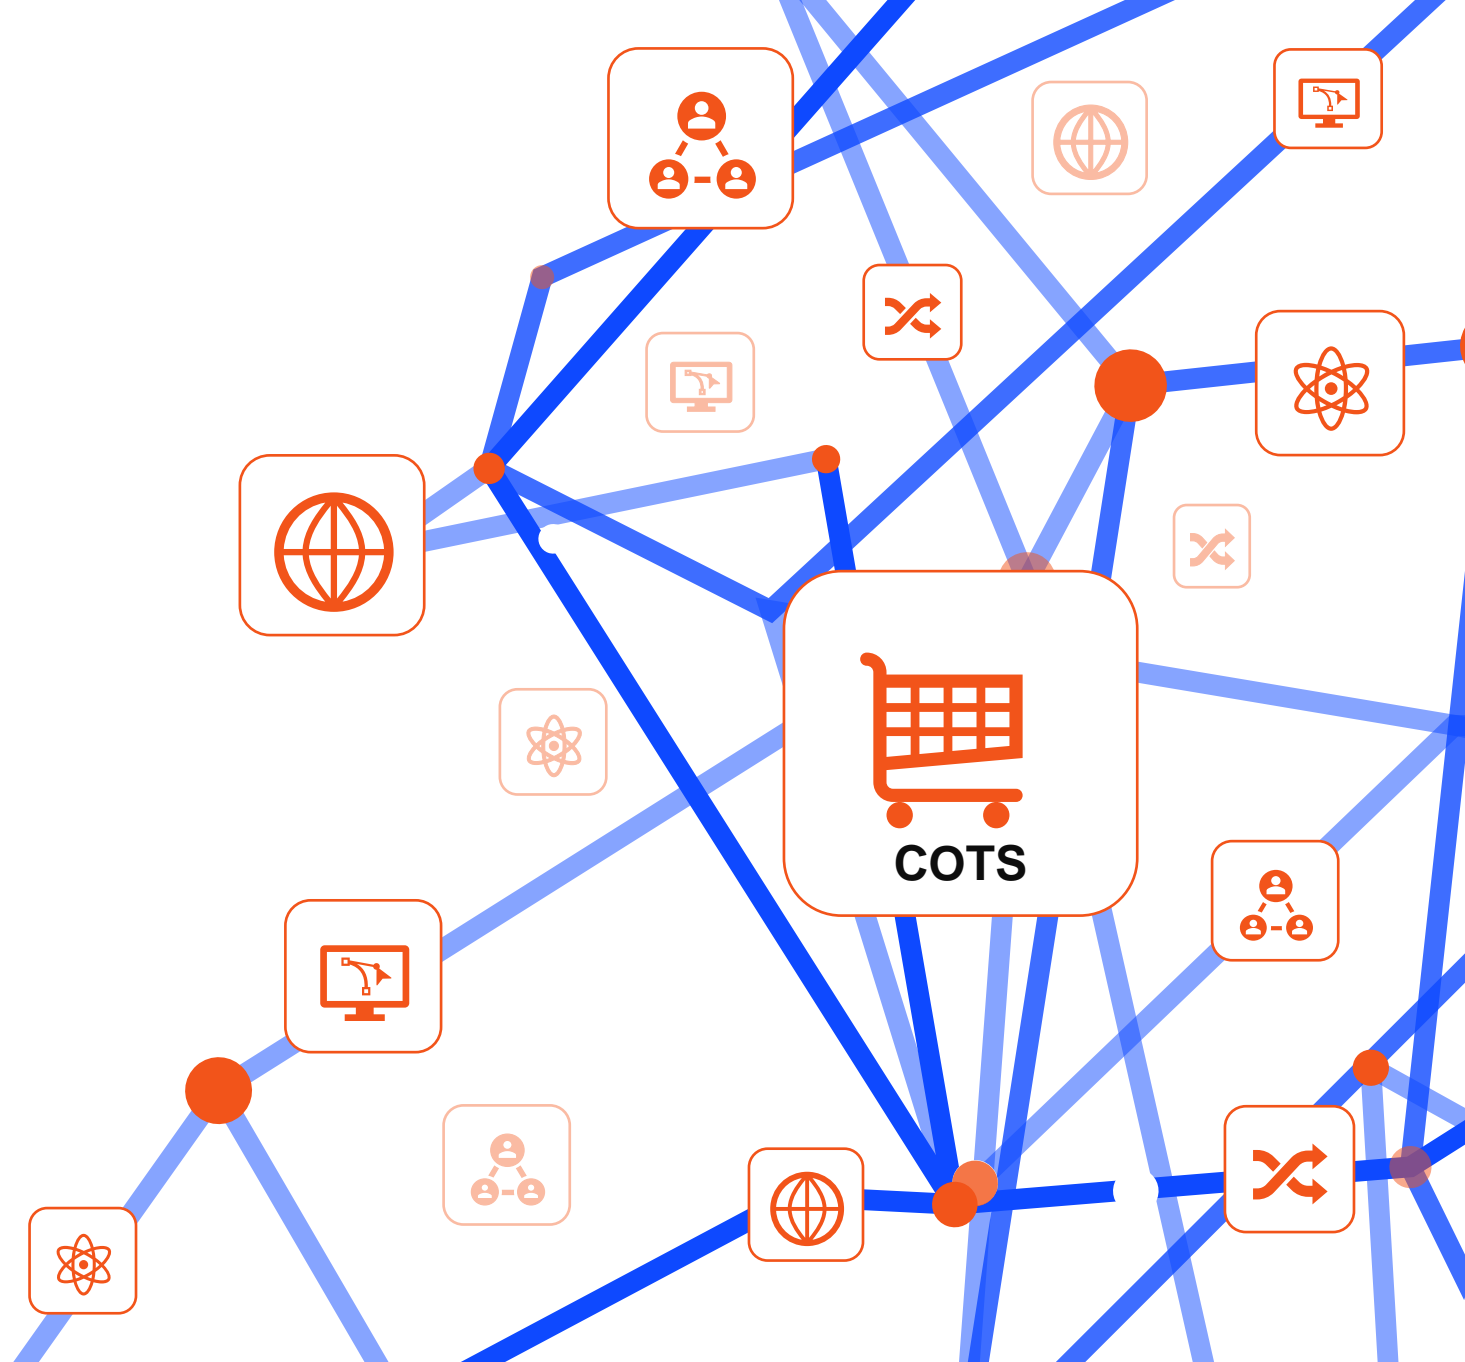

- Authenticated access for government users
- Restricted information sharing
- Collaborate, innovate and solve with partners across government in real time

Digital Atlas for everyone

- Curated and trusted data that is publicly available
- Makes it easy to find and use data
- Fuse multiple data publicly available data sets and even add your own data

Interoperability & collaboration

Ensuring flexibility, accessibility, and sustainability

How we partner across government

Partnership Purposes

The fundamental reasons or goals for which partnerships are formed.

Data sharing

Typically require a long-term or ongoing agreements to be established

Technology and system access

Capacity and capability development

Requires a formal agreement such as a Memorandum of Understanding and/or project plan.

Advisory and governance

Unlock the power of place-based decisions for all Australian's
