

## **Committee of Experts on Global Geospatial Information Management**

### **Tenth session**

New York, 26- 27 August 2020 and 4 September 2020

Item 5 of the agenda

### **Integrated Geospatial Information Framework (for discussion and decision)**

<i>Statement provided by:</i> Denmark	
<i>Statement:</i> Denmark welcomes the efforts of the UNSD on the development of the Integrated Geospatial Information Framework (IGIF). We acknowledge the potential of IGIF in supporting the development of National Geospatial Data Infrastructures, with a main aim to support developing countries, noting that there is not just one-way to implement National Geospatial Data Infrastructures. With this in mind, and considering the well-functioning NSDI implementations in many countries, we find it important to emphasize that IGIF's positive contribution to the community, is underlined by the Framework being optional and voluntary to Member States, which we would request to have noted in the report.
