

## **Committee of Experts on Global Geospatial Information Management**

### **Tenth session**

New York, 26- 27 August 2020 and 4 September 2020

Item 13 of the agenda

### **Implementation and adoption of standards for the global geospatial information community (for information)**

<i>Statement provided by:</i> Brazil	
<i>Statement:</i> The standards development organisations (SDO's) might not only consider mechanisms to facilitate broader training programmes and to ensure the access to standards on reasonable terms, especially for developing countries, but also consider to provide some level of technical support for the job of standards implementation, by those countries. This would be a critical contribution from the SDO's in order to ensure effective compliance to the standards as well as the adoption of the best implementation practices by the countries.  Brazilian Institute of Geography and Statistics (IBGE), Directorate of Geosciences - Coordination of Geomatics
