

# Committee of Experts on Global Geospatial Information Management

## Tenth session

New York, 26- 27 August 2020 and 4 September 2020

Item 8 of the agenda

### Integration of geospatial, statistical and other related information (for information)

<i>Statement provided by:</i> MEXICO	
<i>Statement:</i> Mexico reaffirms the importance of having initiatives such as the Statistical and Geospatial Framework for the Americas (MEGA), which began in 2015 as a proposal to integrate statistical and geospatial information at the regional level, promoting the use of standards and common geographies as well as access to integrated information, currently available from the site <a href="http://www.un-ggim-americas.org/mega/">http://www.un-ggim-americas.org/mega/</a>  Mexico recognizes the importance of promoting the implementation of the GSGF at the regional level and within the framework of UN-GGIM Americas participates in projects such as the “Integration of Statistical and Geospatial Information in Central America”, in which progress is currently being made in the implementation of the Vulnerability Index based on the experience of DANE of Colombia in support of decision-making for taking care of the health emergency caused by Covid-19.
