

## **Committee of Experts on Global Geospatial Information Management**

### **Tenth session**

New York, 26- 27 August 2020 and 4 September 2020

Item 8 of the agenda

### **Integration of geospatial, statistical and other related information (for information)**

<i>Statement provided by:</i> Poland	
<i>Statement:</i> Statistics Poland fully supports the idea and all initiatives aiming at the integration of statistical and geospatial information. Therefore Poland supports the adoption and implementation of the Global Statistical Geospatial Framework (GSGF). Poland supports all taken and proposed actions connected with statistical and spatial data integration since strengthening the interlinkages between the two professional communities (NMA's and NSO's) seems to be crucial. It should be considered as one of the development priorities in all Member states.
