

Committee of Experts on Global Geospatial Information Management

Tenth session

New York, 26- 27 August 2020 and 4 September 2020

Item 8 of the agenda

Integration of geospatial, statistical and other related information (for information)

Statement provided by:

Aligarh Muslim University, India

Statement:

Many countries such as India have a rich data repository of more than a century and well established statistical system. This has further been augmented by the availability of the geospatial data. The integration of these data sets can provide useful information for monitoring the progress of various policies, adopted for development, and to predict the future course of action of correction or continuation of the policies.
