

# Committee of Experts on Global Geospatial Information Management

## Eleventh session

New York, 23, 24 and 27 August 2021

Item 13 of the agenda

### Implementation and adoption of standards for the global geospatial information community (for discussion and decision)

<i>Statement provided by:</i> CHILE	
<i>Statement:</i>  Considering that the application of standards is essential for a correct management of geographic information, we believe that it is necessary to redouble efforts in training for this matter and to seek ways to expand capacities in the use of ISO and OGC standards in emerging or developing countries.  Likewise, we recommend that the UN-GGIM thematic and regional groups establish greater contact with the institutions, inviting their representatives to their plenary meetings, seminars and request specialized collaboration in the preparation of technical documents generated by these thematic and regional groups by UN-GGIM.
