

Committee of Experts on Global Geospatial Information Management

Eleventh session

New York, 23, 24 and 27 August 2021

Item 13 of the agenda

Implementation and adoption of standards for the global geospatial information community (for discussion and decision)

<i>Statement provided by:</i> Argentina Republic	
<i>Statement:</i> <p>Argentina takes note and appreciates the collective efforts of the the three standards development organizations, in support of the measurement and monitoring of the Sustainable Development Goals and in guiding how to apply the standards for the Implementation Guide of the Integrated Geospatial Information Framework.</p> <p>Argentina considers that the Guide to the Integrated Geospatial Information Framework is a key document to support and ensure the implementation and adoption of standards. It also considers that it should be a dynamic document, and supports its use to support the implementation of standards-based solutions.</p> <p>Argentina recommends its broader review and feedback among member states, as well as considering contributions that document the implementations of geospatial standards.</p> <p>Argentina continues working on promoting good practices for the strengthening of technological capacities and human talent, and continuously provides guidelines for the use of standards based at the OGC, ISO.</p>
