

Committee of Experts on Global Geospatial Information Management

Eleventh session

New York, 23, 24 and 27 August 2021

Item 9 of the agenda

Application of geospatial information related to land administration and management (for discussion and decision)

<i>Statement provided by:</i> EuroGeographics AISBL	
<i>Statement:</i>	
<ul style="list-style-type: none">• EuroGeographics notes the report by the Expert Group on Land Administration and Management outlining the work carried out during the past twelve months and the updated work plan for the period 2020 – 2022.• EuroGeographics observes with appreciation the efforts of the Expert Group to further communicate, advocate and raise awareness of effective land administration through its active participation in regional events and by translating the FELA into languages other than English.• EuroGeographics notes and supports the suggestion for EuroSDR to consider a European-level applied research project on the benefits of implementing FELA that would include online learning resource to support raising awareness and promote implementation. We have a continued and active interest in this topic especially through our ‘Knowledge Exchange Network on Cadastre and Land Registration’, and are open for possible cooperation and collaboration with the Expert Group and EuroSDR.• The Association also notes and supports the intention of the Expert Group to organise an international seminar on effective land administration when global conditions permit.
