

# Committee of Experts on Global Geospatial Information Management

## Eleventh session

New York, 23, 24 and 27 August 2021

Item 13 of the agenda

### Implementation and adoption of standards for the global geospatial information community (for discussion and decision)

<i>Statement provided by:</i> Philippines	
<i>Statement:</i>  The Philippines takes note of the report and progress of work undertaken by the standards development organizations, OGC, ISO/TC211, and IHO in facilitating the IGIF and towards achieving the SDGs.  The Philippines endorses the Third Edition of the Standards Guide as a living document while encouraging MS to engage in its review and provide feedback and contributions highlighting narratives on standards use and implementation. We also encourage the broad use of the Standards Guide to ensure interoperability, data sharing, and adaptability to changing data sources and technologies.  The Philippines, being a member of IHO, also encourages MS to participate in international geospatial standards development and meetings.
