

Committee of Experts on Global Geospatial Information Management

Eleventh session

New York, 23, 24 and 27 August 2021

Item 7 of the agenda

Geospatial information for sustainable development (for discussion and decision)

| | |
|--|-------------------------------|
| <i>Statement provided by:</i> MEXICO | |
| <i>Statement:</i> | |
| <ul style="list-style-type: none">• Mexico recognizes the importance of development and future dissemination of the geospatial road map for the Sustainable Development Goals, as it is important to make sure that the Member States can contribute to generate good quality geospatial information for the SDGs, taking advantage of Earth Observations and geospatial data.• It is important to make sure that the Custodian Agencies, and the National Mapping Agencies, National Earth Observation Agencies from the Member States are involved in the production of the geospatial information needed for the SDGs.• Mexico considers that earth observation and geospatial information must be considered as fundamental inputs among the efforts to support global, regional, and local sustainable development. | |
