

**Committee of Experts on Global Geospatial
Information Management**

Eleventh session

New York, 23, 24 and 27 August 2021

Item 9 of the agenda

**Application of geospatial information related to land administration and management
(for discussion and decision)**

<i>Statement provided by:</i> The Netherlands' Cadastre, Land Registry and Mapping Agency	
<i>Statement:</i>	
<ul style="list-style-type: none">- The Netherlands take note and welcome the report of the Expert Group on Land Administration and Management noting the work carried out during the past twelve months including its work plan for the period 2020– 2022.- The Netherlands note and appreciate the efforts of the Expert Group to further communicate, advocate and raise awareness of effective land administration by its practical approach and hands on mentality, participating in a number of events and meetings in the various UN-GGIM regions.- Translation of the FELA into different UN-languages other than English, as volunteered by the members of the Expert Group, increase the access to and understanding of the Framework. This achievement of translation of FELA in the Arabic, Chinese and Spanish language can encourage further volunteered efforts from other Member States to translate the Framework. Enhancement of access and understanding is an important step in awareness raising and promotion of FELA.- It is relevant to note that FELA is aligned to IGIF and is addressing Land Administration Management.
