

Committee of Experts on Global Geospatial Information Management

Eleventh session

New York, 23, 24 and 27 August 2021

Item 6 of the agenda

Global geodetic reference frame (for discussion and decision)

Statement provided by:

National Geographic Information Institute(NGII), Republic of Korea

Statement:

The Republic of Korea would like to express grateful to the Geodetic Subcommittee and all member states for their activities and contributions to strengthening the global geodetic capacity. In particular, we would like to thank the German government and all Member States that have contributed to the establishment of the Global Geodetic Center (GGCE) for the maintenance of the GGRF.

The Global Geodetic Center is expected to play a major role in the establishment and maintenance of GGRF, and its importance is expected to increase. The Republic of Korea will strive to revitalize the operation of GGCE and allow more countries to participate.

In relation to the final adoption of the ‘Subcommittee Tasks for Maintaining GGRF’ in the Position Paper on the maintenance of GGRF, the Republic of Korea is believed to have derived appropriate short- and medium-term tasks for each of the five key areas for maintaining GGRF, and supports the contents.
