

# Committee of Experts on Global Geospatial Information Management

## Eleventh session

New York, 23, 24 and 27 August 2021

Item 5 of the agenda

### Integrated Geospatial Information Framework (for discussion and decision)

<i>Statement provided by:</i> Singapore	
<i>Statement:</i>  Singapore commends the comprehensive efforts of the Committee in the continued development, implementation and refinement of the IGIF Implementation Guide, as a means to strengthen national geospatial information management arrangements, and support the implementation of the UN Sustainable Development Goals. Singapore hopes that Member States would utilise the available guidance and tools of the Implementation Guide in the development of their Country-level Action Plans, to better capitalise on geospatial data and technology in the public and private sectors.  Singapore supports the nominated Member States for the High-level Group of Experts, and is confident that the High-level Group will serve as a key mechanism to continue building on the good work of the IGIF. In this regard, Singapore endorses the High-level Group guiding priorities for immediate attention, namely i) improved communication, ii) capacity development, and iii) sustainable funding.
