

# Committee of Experts on Global Geospatial Information Management

## Eleventh session

New York, 23, 24 and 27 August 2021

Item 6 of the agenda

### Global geodetic reference frame (for discussion and decision)

<i>Statement provided by:</i> Singapore	
<i>Statement:</i>  Singapore supports the establishment of Global Geodetic Centre of Excellence at the United Nations Campus in Bonn, Germany, and expresses its appreciation to Germany for offering to establish and host the Centre. The Centre is a pivotal development to sustain the GGRF through the realisation of governance, policies and standards, geodetic infrastructure, capacity development and outreach, and will serve as a beneficial one-stop source of GGRF knowledge resources for the wider geomatics community and academics to tap into.  Singapore strives to empower the growing local geomatics community with important technical knowledge and capabilities, and encourages greater collaboration between Member States and the Centre through capacity development and outreach efforts.
