

Committee of Experts on Global Geospatial Information Management

Eleventh session

New York, 23, 24 and 27 August 2021

Item 5 of the agenda

Integrated Geospatial Information Framework (for discussion and decision)

Statement provided by:

Deirdre Dalpiaz Bishop, Head of United States Delegation,
United Nations Expert Group on Global Geospatial Information Management

Statement:

The United States recognizes the efforts and leadership of the High-level Group of the Integrated Geospatial Information Framework (HLG-IGIF) to further develop the Integrated Geospatial Information Framework and its Implementation Guide and to ensure the sustained success of the Integrated Geospatial Information Framework as outlined in the report issued May 19, 2021 entitled “Integrated Geospatial Information Framework” (E/C.20/2021/6).

The United States notes the current progress made to refine the Implementation Guide and to provide support for the development of country-level action plans.

The United States is honored to serve as one of the Americas regional committee representatives to the HLG-IGIF. We support the development of the HLG-IGIF strategic plan and the short-term focus on goals and objectives to improve communications, strengthen capacity development, and mobilize sustainable funding for operationalizing the IGIF at the country level.
