

Working Group on Geospatial Information and Services for Disasters

“Strategic Framework on Geospatial Information and Services for Disasters Assessment Survey - Results & Way Forward”

The Strategic Framework on Geospatial Information and Services for Disasters has been adopted at UN-GGIM in 2017. It aims to guide Member States and others in making available and accessible all quality geospatial information and services before, during and after disaster events. In 2020, an assessment survey was administered as a tool to assist Member States in developing their capacity to implement the Strategic Framework. The objectives of this side event are to share the results of the Strategic Framework Assessment survey as presented in the background paper submitted to the eleventh session. We will highlight the major findings from the assessment, supported by a few case studies. Additionally, gaps identified and recommendations on way forward will also be discussed.

Date and Time: Thursday 19 August 2021

6:00 - 7:45 (EDT/UTC-4)

Venue: Virtual - Microsoft Teams

Registration: shorturl.at/qDFJQ

Agenda:
