THE SDGs GEOSPATIAL ROADMAP
IAEG-SDG’s WORKING GROUP ON GEOSPATIAL INFORMATION

PALOMA MERODIO GÓMEZ
INEGI, MEXICO
INTER-AGENCY AND EXPERT GROUP ON SDGs INDICATORS
WORKING GROUP ON GEOSPATIAL INFORMATION

co-Chairs: Ms. Paloma Merodio, Mexico
Mr. Kevin McCormack, Ireland
Statistical Commission Decision 51/101 (i) “Encouraged to continue working on a better integration of geospatial and statistical information to better monitor the 2030 Agenda through the working group on geospatial information”.

The perspective of the IAEG-SDG´s
The SDG Geospatial Roadmap is a document that can "build the bridge" between statistical and geospatial agents working on the SDGs. The Roadmap aims to realize the untapped transformational potential that geospatial information can bring to the SDGs and complement existing work on the global indicator framework.”

IAEG-SDGs and WGGI

Geospatial Data – Global, Regional and National

Disaggregation by Geographic Location

National Experiences of Measuring and Monitoring SDGs Indicators

National Experiences of Producing SDG Indicators with Geospatial Information

Global Frameworks, Standards and Norms

Geospatial Data – Global, Regional and National

National Experiences of Measuring and Monitoring SDGs Indicators

National Experiences of Producing SDG Indicators with Geospatial Information

IAEG-SDGs and WGGI
Vision: “To see geospatial and location-based information being recognized and accepted as official data for the SDGs and their global indicators”

Purpose: The SDGs Geospatial Roadmap is a living resource that helps communicate, guide and enhance the awareness of geospatial information, Earth Observations, and related data sources, tools and methods, to inform and support the implementation, measurement and monitoring of the SDGs, according to national circumstances.

How: The Roadmap outlines how to ‘build the bridge’ between the statistical and geospatial actors working within the global indicator framework, through three phases:

1. Prepare and Plan
2. Design, Development and Testing
3. Measuring, monitoring and reporting geospatially enabled SDG indicators

For both Users (i.e., Countries) and Providers (i.e., Regional Commissions, SDG Custodian Agencies and other Experts) of the SDGs and their global indicators
Following extensive development by the WGGI the SDGs Geospatial Roadmap is submitted to the Commission for adoption by the IAEG-SDGs.

The Roadmap was adopted by the IAEG-SDGs at its 12th meeting in November 2021.

The Roadmap is presented to the Commission in English, French and Spanish. Offers/resources to support its translation are greatly appreciated.

The Roadmap is also provided in an interactive “Storymap”, to support its communication and to interactively ‘tell the story’ of how countries are using geospatial information for the SDGs.
THANK YOU!
